## CHAPTER 14

## STATISTICS

## ONE MARK QUESTIONS

## Multiple Choice Questions

1. The median and mode respectively of a frequency distribution are 26 and 29 , Then its mean is
(a) 27.5
(b) 24.5
(c) 28.4
(d) 25.8

Ans :
[Board 2020 Delhi Basic]
We have

$$
\begin{aligned}
M_{o} & =3 M_{d}-2 M \\
29 & =3 \times 26-2 M \\
2 M & =78-29=49 \\
M & =\frac{49}{2}=24.5
\end{aligned}
$$

Thus (b) is correct option.
2. The cumulative frequency table is useful in determining
(a) Mean
(b) Median
(c) Mode
(d) All of these

## Ans :

[Board 2020 OD Basic]
Cumulative frequency is defined as a running total of frequencies. It is helpful in finding the mean, median and mode.
Thus (d) is correct option.
3. In a frequency distribution, the mid value of a class is 10 and the width of the class is 6 . The lower limit of the class is
(a) 6
(b) 7
(c) 8
(d) 12

Ans :
Let $x$ be the upper limit and $y$ be the lower limit.
Since the mid value of the class is 10 .
Hence,

$$
\begin{align*}
& \frac{x+y}{2}=10 \\
& x+y=20 \tag{1}
\end{align*}
$$

Since width of the class is 6 ,

$$
\begin{equation*}
x-y=6 \tag{2}
\end{equation*}
$$

Solving (1) and (2), we get $y=7$
Hence, lower limit of the class is 7 .
Thus (b) is correct option.
4. Consider the following frequency distribution of the heights of 60 students of a class

| Height <br> (in cm) | $150-$ <br> 155 | $155-$ <br> 160 | $160-$ <br> 165 | $165-$ <br> 170 | $170-$ <br> 175 | $175-$ <br> 180 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 15 | 13 | 10 | 8 | 9 | 5 |

The upper limit of the median class in the given data is
(a) 165
(b) 155
(c) 160
(d) 170

Ans:
[Board 2020 SQP Standard]
We prepare the following cumulative table

| Height $x$ (in <br> $\mathrm{cm})$ | Number of <br> Students $(f)$ | $c f$ |
| :--- | :--- | :--- |
| $150-155$ | 15 | 15 |
| $155-160$ | 13 | 28 |
| $160-165$ | 10 | 38 |
| $165-170$ | 08 | 46 |
| $170-175$ | 09 | 55 |
| $175-180$ | 08 | 63 |
|  | $N=63$ |  |

We have,

$$
N=63 ; \frac{N}{2}=\frac{63}{2}=31.5
$$

The cumulative frequency just greater than $\frac{N}{2}$ is 38 and the corresponding class is $160-165$. Thus upper limit is 165 .
Thus (a) is correct option.
5. For finding the popular size of readymade garments, which central tendency is used?
(a) Mean
(b) Median
(c) Mode
(d) Both Mean and Mode

## Ans :

For finding the popular size of ready made garments, mode is the best measure of central tendency.
Thus (c) is correct option.
6. If the difference of mode and median of a data is 24 , then the difference of median and mean is
(a) 12
(b) 24
(c) 08
(d) 36

Ans:
We have, $\quad M_{o}-M_{d}=24$
We know $\quad M_{o}=3 M_{d}-2 M$
Now $\quad M_{o}-M_{d}=2 M_{d}-2 M$

$$
24=2\left(M_{d}-M\right)
$$

$$
M_{d}-M=12
$$

Thus (a) is correct option.
7. If the mean of the numbers $27+x, 31+x, 89+x$ $107+x, 156+x$ is 82 , then the mean of $130+x$, $126+x, 68+x, 50+x$, and $1+x$ is
(a) 75
(b) 157
(c) 82
(d) 80

Ans :
Given,

$$
82=\frac{(27+x)+(31+x)+(89+x)+(107+x)+(156+x)}{5}
$$

$$
\begin{aligned}
82 \times 5 & =410+5 x \\
410-410 & =5 x \Rightarrow x=0
\end{aligned}
$$

Required mean is,

$$
\begin{aligned}
\bar{x} & =\frac{130+x+126+x+68+x+50+x+1+x}{5} \\
& =\frac{375+5 x}{5}=\frac{375+0}{5} \\
& =\frac{375}{5}=75
\end{aligned}
$$

Thus (a) is correct option.
8. The median of a set of 9 distinct observations is
20.5. If each of the largest 4 observation of the set is increased by 2 , then the median of the new set
(a) Is increased by 2
(b) Is decreased by 2
(c) Is two times the original median
(d) Remains the same as that of the original set

Ans :
Since, $\quad n=9$
then, $\quad$ median term $=\left(\frac{9+1}{2}\right)^{\text {th }}=5^{\text {th }}$ item.
Now, last four observations are increased by 2, but median is $5^{\text {th }}$ observation, which is remaining unchanged. Hence there will be no change in median. Thus (d) is correct option.
9. If the coordinates of the point of intersection of less than ogive and more than ogive is $(13.5,20)$, then the value of median is
(a) 13.5
(b) 20
(c) 33.5
(d) 7.5

Ans :
The abscissa of point of intersection gives the median of the data. So, median is 13.5 .
Thus (a) is correct option.
10. A set of numbers consists of three 4's, five 5 's, six 6 's, eight 8's and seven 10's. The mode of this set of numbers is
(a) 6
(b) 7
(c) 8
(d) 10

Ans :
Mode of the data is 8 as it is repeated maximum number of times.
Thus (c) is correct option.
11. If the mean of the observation $x, x+3, x+5, x+7$ and $x+10$ is 9 , the mean of the last three observation is
(a) $10 \frac{1}{3}$
(b) $10 \frac{2}{3}$
(c) $11 \frac{1}{3}$
(d) $11 \frac{2}{3}$

Ans :

$$
\begin{aligned}
\text { Mean } & =\frac{\text { Sum of all the observations }}{\text { Total no. of observation }} \\
9 & =\frac{x+x+3+x+5+x+7+x+10}{5} \\
9 & =\frac{5 x+25}{5}
\end{aligned}
$$

$$
x=4
$$

So, mean of last three observation,

$$
\begin{aligned}
& =\frac{x+5+x+7+x+10}{3}=\frac{5 x+22}{3} \\
& \frac{3 x+22}{3}=\frac{3 \times 4+22}{3} \\
& =\frac{12+22}{3}=\frac{34}{3}=11 \frac{1}{3}
\end{aligned}
$$

Thus (c) is correct option.
12. The mean weight of 9 students is 25 kg . If one more student is joined in the group the mean is unaltered, then the weight of the $10^{\text {th }}$ student is
(a) 25 kg
(b) 24 kg
(c) 26 kg
(d) 23 kg

Ans:
The sum of the weights of the 9 students $=25 \times 9=225$. If one more student is joined in the group, then total number of students is 10 and mean is 25 .
Hence, the sum of the weights of the $10^{\text {th }}$ students $=25 \times 10=250$.
Hence, the weight of the $10^{\text {th }}$ student is $250-225$ $=25 \mathrm{~kg}$.
However we can answer this question without any calculation. If mean is not altered on adding more data, then added data must be of mean value.
Thus (a) is correct option.
13. The mean and median of the data $a, b$ and $c$ are 50 and 35 respectively, where $a<b<c$. If $c-a=55$, then $(b-a)$ is
(a) 8
(b) 7
(c) 3
(d) 5

Ans :
Since, $a, b$ and $c$ and are in ascending order, therefore median is $b$ i.e $b=35$.
Mean $\quad \frac{a+b+c}{3}=50$

$$
\begin{align*}
a+b+c & =150 \\
a+c & =150-35=115 \tag{1}
\end{align*}
$$

Also, it is given that $c-a=55$

Subtracting equation (2) and (1), we get

$$
a=30
$$

Hence, $\quad b-a=35-30=5$
Thus (d) is correct option.
14. Observations of some data are $\frac{x}{5}, x, \frac{x}{3}, \frac{2 x}{3}, \frac{x}{4}, \frac{2 x}{5}$ and $\frac{3 x}{4}$ where $x>0$. If the median of the data is 4 , then the value of $x$ is
(a) 5
(b) 15
(c) 9
(d) 10

Ans :
Given observations are $\frac{x}{5}, x, \frac{x}{3}, \frac{2 x}{3}, \frac{x}{4}, \frac{2 x}{5}$ and $\frac{3 x}{4}$ where $x>0$. On arranging the above observations in ascending order, we get

$$
\frac{x}{5}, \frac{x}{4}, \frac{x}{3}, \frac{2 x}{5}, \frac{2 x}{3}, \frac{3 x}{4}, x
$$

Here, total number of observations are 7, which is odd.

$$
\begin{aligned}
\text { Median } & =\left(\frac{n+1}{2}\right)^{\text {th }} \text { observation } \\
& =\left(\frac{7+1}{2}\right)^{\text {th }} \text { observation } \\
& =4^{\text {th }} \text { observation }=\frac{2 x}{5} \\
\text { Median } & =\frac{2 x}{5}=4 \\
x & =\frac{4 \times 5}{2}=10
\end{aligned}
$$

Thus (d) is correct option.
15. If the mean of the squares of first $n$ natural numbers is 105 , then the first $n$ natural numbers is
(a) 8
(b) 9
(c) 10
(d) 11

Ans :
Sum of square, $\sum x^{2}=\frac{n(n+1)(2 n+1)}{6}$
Mean of squares of first $n$ natural numbers,

$$
\begin{gathered}
105=\frac{(n+1)(2 n+1)}{6} \\
2 n^{2}+3 n+1=630 \\
2 n^{2}+3 n-629=0 \\
2 n^{2}+37 n-34 n-629=0 \\
n(2 n+37)-17(2 n+37)=0 \\
(2 n+37)(n-17)=0 \Rightarrow n=17
\end{gathered}
$$

Since, $n$ is odd, therefore median is $=\left(\frac{17+1}{2}\right)^{\text {th }}=9^{\text {th }}$ observation.
Thus (b) is correct option.
16. Mode of the following grouped frequency distribution is

| Class | Frequency |
| :--- | :--- |
| $3-6$ | 2 |
| $6-9$ | 5 |
| $9-12$ | 10 |
| $12-15$ | 23 |
| $15-18$ | 21 |
| $18-21$ | 12 |
| $21-24$ | 03 |

(a) 13.6
(b) 15.6
(c) 14.6
(d) 16.6

Ans :
We observe that the class $12-15$ has maximum frequency 23 . Therefore, this is the modal class.

We have, $l=12, h=3, f_{1}=23, f_{0}=10$ and $f_{2}=21$

$$
\begin{aligned}
M_{o} & =l+\frac{f_{1}-f_{0}}{2 f_{1}-f_{1}-f_{2}} \times h \\
& =12+\frac{23-10}{46-10-21} \times 3 \\
& =12+\frac{13}{15} \times 3 \\
& =12+\frac{13}{5}=14.6
\end{aligned}
$$

Thus (c) is correct option.
17. While computing the mean of grouped data, we assume that the frequencies are
(a) evenly distributed over all the classes
(b) centred at the class marks of the classes
(c) centred at the upper limits of the classes
(d) centred at the lower limits of the classes

Ans :
While computing mean of ground data, we
assume that the frequencies distribution table.
Thus (b) is correct option.
18. If median is 137 and mean is 137.05 , then the value of mode is
(a) 156.90
(b) 136.90
(c) 186.90
(d) 206.90

Ans :

$$
\begin{aligned}
M_{o} & =3 M_{d}-2 M \\
& =3(137)-2(137.05) \\
& =411-274.10=136.90
\end{aligned}
$$

Thus (b) is correct option.
19. The following data gives the distribution of total household expenditure (in $<$ ) of manual workers in a city.

| Expenditure (in $<$ ) | Frequency |
| :--- | :--- |
| $1000-1500$ | 24 |
| $1500-2000$ | 40 |
| $2000-2500$ | 33 |
| $2500-3000$ | 28 |
| $3000-3500$ | 30 |
| $3500-4000$ | 22 |
| $4000-4500$ | 16 |
| $4500-5000$ | 07 |

Then, find the average expenditure which is done by the maximum number of manual workers.
(a) 1747.26
(b) 1847.26
(c) 1947.26
(d) 2047.26

Ans :
We observe that the class 1500-2000 has maximum frequency 40. Therefore, this is the modal class.
We have $l=1500, h=500, f_{1}=40, f_{0}=24$ and $f_{2}=23$

$$
\begin{aligned}
M_{o} & =l+\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}} \times h \\
& =1500+\frac{40-24}{80-24-33} \times 500 \\
& =1500+\frac{16}{23} \times 500 \\
& =1847.26
\end{aligned}
$$

Thus (b) is correct option.
20. For the following distribution

| Marks | Number of <br> Students | Marks | Number of <br> students |
| :--- | :--- | :--- | :--- |
| Below 10 | 3 | Below 40 | 57 |
| Below 20 | 12 | Below 50 | 75 |
| Below 30 | 28 | Below 60 | 80 |

The modal class is
(a) $0-20$
(b) 20-30
(c) $30-40$
(d) 50-60

Ans :
Let us first construct the following frequency distribution table.

| Marks | Number of Students |
| :--- | :--- |
| $0-10$ | 3 |
| $10-20$ | 9 |
| $20-30$ | 16 |
| $30-40$ | 29 |
| $40-50$ | 18 |
| $50-60$ | 5 |

Since, the maximum frequency is 29 and the class corresponding to this frequency is $30-40$. So, the modal class is $30-40$.
Thus (c) is correct option.
21. If $X, M$ and $Z$ are denoting mean, median and mode of a data and $X: M=9: 8$, then the ratio $M: Z$ is
(a) $3: 4$
(b) $4: 9$
(c) $4: 3$
(d) $2: 5$

Ans :
Since,

$$
\begin{align*}
M_{o} & =3 M_{d}-2 M \\
Z & =3 M-2 X \tag{1}
\end{align*}
$$

Now

$$
\begin{aligned}
X: M & =9: 8 \\
\frac{X}{M} & =\frac{9}{8} \\
X & =\frac{9 M}{8}
\end{aligned}
$$

Substituting the value of $X$ in equation (1), we get

$$
\begin{aligned}
Z & =3 M-2 \times \frac{9 M}{8}=3 M-\frac{9 M}{4} \\
Z & =\frac{3 M}{4} \\
\frac{M}{Z} & =\frac{4}{3}
\end{aligned}
$$

or $\quad M: Z=4: 3$
Thus (c) is correct option.
22. A student noted the number of cars passing through a spot on a road for 100 periods each of 3 min and summarised in the table give below.

| Number of cars | Frequency |
| :--- | :--- |
| $0-10$ | 7 |
| $10-20$ | 14 |
| $20-30$ | 13 |
| $30-40$ | 12 |
| $40-50$ | 20 |
| $50-60$ | 11 |
| $60-70$ | 15 |
| $70-80$ | 08 |

Then, the mode of the data is
(a) 34.7
(b) 44.7
(c) 54.7
(d) 64.7

Ans :
Here, modal class is 40-50. Since, it has maximum frequency which is 20 .

So, $l=40, f_{1}=20, f_{0}=12, f_{2}=11$ and $h=10$

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) \times h \\
& =40+\left(\frac{20-12}{40-12-11}\right) \times 10 \\
& =40+\frac{80}{17} \\
& =40+4.7=44.7 \mathrm{cars}
\end{aligned}
$$

Thus (b) is correct option.
23. If the mean of $a, b, c$ is $M$ and $a b+b c+c a=0$, the mean of $a^{2}, b^{2}$ and $c^{2}$ is $K M^{2}$, then $K$ is equal to
(a) 3
(b) 9
(c) 6
(d) 4

Ans :
We have $\frac{a+b+c}{3}=M$

$$
a+b+c=3 M
$$

and

$$
\frac{a^{2}+b^{2}+c^{2}}{3}=K M^{2}
$$

Now, $\quad(a+b+c)^{2}=a^{2}+b^{2}+c^{2}+2(a b+b c+c a)$

$$
\begin{aligned}
(a+b+c)^{2} & =a^{2}+b^{2}+c^{2} \quad[a b+b c+c a=0] \\
(3 M)^{2} & =3 K M^{2} \\
9 M^{2} & =3 K M^{2} \Rightarrow K=3
\end{aligned}
$$

Thus (a) is correct option.
24. In the formula $\bar{x}=a+\frac{\sum f_{i} d_{i}}{\sum f_{i}}$, for finding the mean of grouped data $d_{i}$ 's are deviation from $a$ of
(a) lower limits of the classes
(b) upper limits of the classes
(c) mid-points of the classes
(d) frequencies of the class marks

Ans :
Mid-point of the classes $=\left(x_{i}-a\right)$,
where, $\quad x_{i}=\frac{\text { upper limit }+ \text { lower limit }}{2}$
So, the option (c) is correct, which is the required answer.
Thus (c) is correct option.
25. While computing mean of grouped data, we assume that the frequencies are
(a) evenly distributed over all the classes
(b) centred at the class marks of the classes
(c) centred at the upper limits of the classes
(d) centred at the lower limits of the classes

## Ans: (b) centred at the class marks of the classes

Frequencies are centred at the class-marks of the classes.
So, the option (b) is correct, which is the required answer.
Thus (b) is correct option.
26. If $x_{i}$ 's are the mid-points of the class intervals of grouped data, $f_{i}$ 's are the corresponding frequencies and $\bar{x}$ is the mean, then $\sum\left(f_{i} x_{i}-\bar{x}\right)$ is equal to
(a) 0
(b) -1
(c) 1
(d) 2

Ans :

$$
\begin{aligned}
\sum\left(f_{i} x_{i}-\bar{x}\right) & =\sum f_{i} x_{i}-\sum \bar{x}=\sum f_{i} x_{i}-n \bar{x} \\
& =\sum f_{i} x_{i}-\sum f_{i} x_{i}=0 \quad\left(\bar{x}=\frac{\sum f_{i} x_{i}}{n}\right)
\end{aligned}
$$

So, the option (a) is correct, which is the required answer.
27. In the formula $\bar{x}=a+h\left(\frac{\sum f_{i} u_{i}}{\sum f_{i}}\right)$, for finding the
mean of grouped frequency distribution, $u_{i}$ is equal to
(a) $\frac{x_{i}+a}{h}$
(b) $h\left(x_{i}-a\right.$
(c) $\frac{x_{i}-a}{h}$
(d) $\frac{a-x_{i}}{h}$

Ans :
We know that, $\quad u_{i}=\frac{x_{i}-a}{h}$
So, the option (c) is correct, which is the required answer.
Thus (c) is correct option.
28. The abscissa of the point of intersection of the less than type and of the more than type cumulative frequency curves of a grouped data gives its
(a) mean
(b) median
(c) mode
(d) All of these

Ans :

It gives median of the grouped-data.
So, the option (b) is correct, which is the required answer.
Thus (b) is correct option.
29. For the following distribution.

| Class | $0-5$ | $5-10$ | $10-15$ | $15-20$ | $20-25$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 15 | 12 | 20 | 9 |

the sum of lower limits of the median class and modal class is
(a) 15
(b) 25
(c) 30
(d) 35

Ans :
Here,

| Class | Frequency | Cumulative frequency |
| :--- | :--- | :--- |
| $0-5$ | 10 | 10 |
| $5-10$ | 15 | 25 |
| $10-15$ | 12 | 37 |
| $15-20$ | 20 | 57 |
| $20-25$ | 9 | 66 |

Now, $\frac{N}{2}=\frac{33}{2}=33$, which lies in the interval 10-15. Therefore, lower limit of the median class is 10 .
The highest frequency is 20 , which lies in the interval $15-20$. Therefore, lower limit of modal class is 15 . Hence, required sum is $10+15=25$.
Thus (b) is correct option.
30. Consider the following frequency distribution

| Class | $0-5$ | $6-11$ | $12-17$ | $18-23$ | $24-29$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 13 | 10 | 15 | 8 | 11 |

The upper limit of the median class is
(a) 17
(b) 17.5
(c) 18
(d) 18.5

Ans :
Given, classes are not continuous, so we make continuous by subtracting 0.5 from lower limit and adding 0.5 to upper limit of each class.

| Class | Frequency | Cumulative frequency |
| :--- | :--- | :--- |
| $-0.5-5.5$ | 13 | 13 |
| $5.5-11.5$ | 10 | 23 |
| $11.5-17.5$ | 15 | 38 |
| $17.5-23.5$ | 8 | 46 |
| $23.5-29.5$ | 11 | 57 |

Here, $\frac{N}{2}=\frac{57}{2}=28.5$, which lies in the interval $11.5-17.5$. Hence, the upper limit is 17.5 .
Thus (b) is correct option.
31. For the following distribution:

| Marks | Number of students |
| :--- | :--- |
| Below 10 | 3 |
| Below 20 | 12 |
| Below 30 | 27 |
| Below 40 | 57 |
| Below 50 | 75 |
| Below 60 | 80 |

The modal class is
(a) 10-20
(b) 20-30
(c) $30-40$
(d) 50-60

Ans :

| Marks | Number of students |
| :--- | :--- |
| $0-10$ | $3-0=3$ |
| $10-20$ | $12-3=9$ |
| $20-30$ | $27-12=15$ |
| $30-40$ | $57-27=30$ |
| $40-50$ | $75-57=18$ |
| $50-60$ | $80-75=5$ |

Class 30-40 has the maximum frequency 30 , therefore this is model class.
Thus (c) is correct option.
32. Consider the data:

| Class | $65-$ <br> 85 | $85-$ <br> 105 | $105-$ <br> 125 | $125-$ <br> 145 | $145-$ <br> 165 | $165-$ <br> 185 | $185-$ <br> 205 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 4 | 5 | 13 | 20 | 14 | 7 | 4 |

The difference of the upper limit of the median class and the lower limit of the modal class is
(a) 0
(b) 19
(c) 20
(d) 38

Ans :

| Class | Frequency | Cumulative frequency |
| :--- | :--- | :--- |
| $65-85$ | 4 | 7 |
| $85-105$ | 5 | 9 |
| $105-125$ | 13 | 22 |
| $125-145$ | 20 | 42 |
| $145-165$ | 14 | 56 |
| $165-185$ | 7 | 63 |
| $185-205$ | 4 | 67 |

Here, $\frac{N}{2}=\frac{67}{2}=33.5$, which lies in the interval $125-145$. Hence, upper limit of median class is 145.
Here, we see that the highest frequency is 20 which lies in 125-145. Hence, the lower limit of modal class is 125 .
Required difference

$$
=\text { Upper limit of median class }
$$

- Lower limit of modal class

$$
=145-125=20
$$

Thus (c) is correct option.
33. The times, in seconds, taken by 150 athletes to run a 110 m hurdle race are tabulated below

| Class | Frequency |
| :--- | :--- |
| $13.8-14$ | 2 |
| $14-14.2$ | 4 |
| $14.2-14.4$ | 5 |
| $14.4-14.6$ | 71 |
| $14.6-14.8$ | 48 |
| $14.8-15$ | 20 |

The number of athletes who completed the race in less than 14.6 second is :
(a) 11
(b) 71
(c) 82
(d) 130

Ans :
The number of athletes who completed the race in less than 14.6

$$
=2+4+5+71=82
$$

Thus (c) is correct option.
34. Consider the following distribution :

| Marks obtained | Number of students |
| :--- | :--- |
| More than or equal to 0 | 63 |
| More than or equal to 10 | 58 |
| More than or equal to 20 | 55 |
| More than or equal to 30 | 51 |
| More than or equal to 40 | 48 |
| More than or equal to 50 | 42 |

the frequency of the class $30-40$ is :
(a) 3
(b) 4
(c) 48
(d) 51

Ans :

| Marks obtained | Number of students |
| :--- | :--- |
| $0-10$ | $(63-58)=5$ |
| $10-20$ | $(58-55)=3$ |
| $20-30$ | $(55-51)=4$ |
| $30-40$ | $(51-48)=3$ |
| $40-50$ | $(48-42)=6$ |
| $50-60$ | $42=42$ |

Hence, frequency in the class interval $30-40$ is 3 .
Thus (a) is correct option.
35. Assertion : If the number of runs scored by 11 players of a cricket team of India are $5,19,42,11,50,30,21$, $0,52,36,27$ then median is 30 .
Reason : Median $=\left(\frac{n+1}{2}\right)^{\text {th }}$ value, if $n$ is odd.
(a) Both assertion (A) and reason (R) are true and reason (R) is the correct explanation of assertion (A).
(b) Both assertion (A) and reason (R) are true but reason ( R ) is not the correct explanation of assertion (A).
(c) Assertion (A) is true but reason (R) is false.
(d) Assertion (A) is false but reason (R) is true.

Ans :
Arranging the terms in ascending order, $0,5,11,19,21,27,30,36,42,50,52$

$$
\text { Median value }=\left(\frac{11+1}{2}\right)^{\text {th }}
$$

$$
=6^{\text {th }} \text { value }=27
$$

Assertion (A) is false but reason (R) is true.
Thus (d) is correct option.
Fill in the Blank Questions
36. $\qquad$ is mid value of class interval.
Ans :
Class mark
37. $\qquad$ is the value of the observation having the maximum frequency.
Ans :
Mode
38. The mid-point of a class interval is called its $\qquad$
Ans :
class-mark
39. The $\qquad$ is the most frequently occurring observation.
Ans :
mode
40. Facts or figures, collected with a definite purpose, are called $\qquad$
Ans :
data
41. To find the mode of a grouped data, the size of the
classes is $\qquad$
Ans :
uniform
42. $\qquad$ is graphical representation of cumulative frequency distribution.
Ans:
Ogive
43. Median divides the total frequency into $\qquad$ equal parts.
Ans:
two
44. Average of a data is called $\qquad$
Ans :
Mean
45. On an ogive, point A (say), whose Co-ordinated is $\frac{n}{2}$ (half of the total observation), has its X-coordinate equal to $\qquad$ of the data.
Ans :
Median
46. Value of the middle-most observation (s) is called

## Ans :

median
47. Two ogive, for the same data intersect at the point P . Then Y-coordinate of P represents $\qquad$
Ans:
cumulative
48. The algebraic sum of the deviations from arithmetic mean is always $\qquad$
Ans:
zero

## Very Short Answer Questions

49. Find the class-marks of the classes 10-25 and 35-66.

Ans :
[Board 2020 OD Standard]
Class mark of $10-25,=\frac{10+25}{2}=\frac{35}{2}=17.5$
and class mark of $35-55,=\frac{35+55}{2}=\frac{90}{2}=45$
50. Find the class marks of the classes 15-35 and 45-60.

Ans :
[Board 2020 OD Standard]
Class mark of $15-35=\frac{15+35}{2}=\frac{50}{2}=25$
and class mark of $45-60=\frac{45+60}{2}=\frac{105}{2}=52.5$
51. If the mean of the first $n$ natural number is 15 , then find $n$.
Ans :
[Board 2020 Delhi Standard]
Given : $1,2,3,4, \ldots$ to $n$ terms.
The sum of first $n$ natural numbers

$$
\begin{aligned}
S_{n} & =\frac{n(n+1)}{2} \\
M & =\frac{n(n+1)}{2 \times n} \\
15 & =\frac{n(n+1)}{2 \times n} \\
15 & =\frac{n+1}{2} \\
n+1 & =30 \Rightarrow n=29
\end{aligned}
$$

Download 20 Set Sample Papers Free PDFs for all Subject from www.cbse.online
52. Find the class marks of the classes 20-50 and 35-60. Ans :
[Board 2020 OD Standard]

Class mark of $20-50 \quad=\frac{20+50}{2}=\frac{70}{2}=35$ and
Class mark of $35-60=\frac{35+60}{2}=\frac{95}{2}=47.5$.
53. If the median of a series exceeds the mean by 3 , find by what number the mode exceeds its mean?
Ans :
[Board Term-1, 2015]
We have $\quad M_{d}=M+3$
Now

$$
\begin{aligned}
M_{o} & =3 M_{d}-2 M \\
& =3(M+3)-2 \\
& =3 M+9-2 M=M+9
\end{aligned}
$$

Hence mode exceeds mean by 9 .
54. From the following frequency distribution, find the median class :

| Cost of <br> living index | $1400-$ <br> 1500 | $1550-$ <br> 1700 | $1700-$ <br> 1850 | $1850-$ <br> 2000 |
| :--- | :--- | :--- | :--- | :--- |
| Number of <br> weeks | 8 | 15 | 21 | 8 |

## Ans :

[Board Term-1, 2015]
We prepare following cumulative frequency table to find median class.

| Cost of living index | Number of weeks $f$ | c.f. |
| :--- | :--- | :--- |
| $1400-1500$ | 8 | 8 |
| $1550-1700$ | 15 | 23 |
| $1700-1850$ | 21 | 44 |
| $1850-2000$ | 8 | 52 |

We have $\quad N=52 ; \frac{N}{2}=26$
Cumulative frequency just greater than $\frac{N}{2}$ is 44 and the corresponding class is $1700-1850$.
Thus median class is $1700-1850$.
55. In the following frequency distribution, find the median class.

| Height <br> (in cm) | $104-$ <br> 145 | $145-$ <br> 150 | $150-$ <br> 155 | $155-$ <br> 160 | $160-$ <br> 165 | $165-$ <br> 170 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 15 | 25 | 30 | 15 | 10 |

## Ans:

[Board Term-1 2015]
We prepare following cumulative frequency table to find median class.

| Height | Frequency | c.f. |
| :--- | :--- | :--- |
| $140-145$ | 5 | 5 |
| $145-150$ | 15 | 20 |
| $150-155$ | 25 | 45 |
| $155-160$ | 30 | 75 |
| $160-165$ | 15 | 90 |
| $165-170$ | 10 | 100 |
|  | $N=100$ |  |

We have $\quad N=100 ; \frac{N}{2}=50$
Cumulative frequency just greater than $\frac{N}{2}$ is 75 and the corresponding class is $155-160$. Thus median class is $155-160$.
56. Find median of the data, using an empirical relation
when it is given that Mode $=12.4$ and Mean $=10.5$.
Ans :
[Board Term-1, 2015]

$$
\begin{aligned}
& \text { Mode, } \\
& \text { Mean, } \\
& \text { Median, }
\end{aligned} \quad \begin{aligned}
M_{o} & =12.4 \\
M & =10.5 \\
& \\
& =\frac{1}{3}(12.4)+\frac{2}{3}(10.5) \\
& =\frac{12.4}{3}+\frac{21}{3} \\
& =\frac{12.4+21}{3}=\frac{33.4}{3} \\
& =\frac{33.4}{3}=11.13
\end{aligned}
$$

57. Consider the following distribution :

| Marks <br> Obtained | 0 or <br> more | 10 or <br> more | 20 or <br> more | 30 or <br> more | 40 or <br> more | 50 or <br> more |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 63 | 58 | 55 | 51 | 48 | 42 |

(i) Calculate the frequency of the class $30-40$.
(ii) Calculate the class mark of the class 10-25.

Ans :
[Board Term-1, 2014]

| Class Interval | c.f. | $f$ |
| :--- | :--- | :--- |
| $0-10$ | 63 | 5 |
| $10-20$ | 58 | 3 |
| $20-30$ | 55 | 4 |
| $30-40$ | 51 | 3 |
| $40-50$ | 48 | 6 |
| $50-60$ | 42 | 42 |

(i) Frequency of the class $30-40$ is 3 .
(ii) Class mark of the class : $10-25=\frac{10+25}{2}$

$$
=\frac{35}{2}=17.5
$$

58. Which central tendency is obtained by the abscissa of point of intersection of less than type and more than type ogives ?
Ans :
Median.
59. What is abscissa of the point of intersection of the "Less than type" and of the "More than type" cumulative frequency curve of a grouped data?
Ans:
The abscissa of the point of intersection of the "Less than type" and "More than type" cumulative frequency curve of a grouped data is median.
60. Find the mean of the data using an empirical formula when it is given that mode is 50.5 and median in 45.5 .
Ans :
[Board Term-1 2015]
Mode,

$$
M=50.5
$$

Median,

$$
M_{d}=45.5
$$

Now

$$
3 M_{d}=M_{o}+2 M
$$

$$
3 \times 45.5=50.5+2 M
$$

Mean,

$$
M=\frac{136.5-50.5}{2}=43
$$

Hence mean is 43 .
61. Find the mean of first odd multiples of 5 .

Ans :
[Board Term-1 2012]
The first five odd multiples of 5 , according to the problem are : $5,15,25,35,45$

Mean

$$
=\frac{5+15+25+35+45}{5}=\frac{125}{5}=25
$$

62. Median of a data is 52.5 and its mean is 54 , use empirical relationship between three measure of central tendency to find its mode.
Ans :
[Board Term-1 2012]
Median

$$
M_{d}=52.5
$$

and mean

$$
M=54
$$

Now

$$
3 M_{d}=M_{o}+2 M
$$

$$
3 \times 52.5=M_{o}+2 \times 54
$$

Mode

$$
M_{o}=157.5-108=49.5
$$

## TWO MARKS QUESTIONS

63. Find the mean the following distribution :

| Class | $3-5$ | $5-7$ | $7-9$ | $9-11$ | $11-13$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 10 | 10 | 7 | 8 |

Ans :
[Board 2020 Delhi Standard]

| Class | Frequency $\left(f_{i}\right)$ | Mid-Value <br> $\left(x_{i}\right)$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $3-5$ | 5 | 4 | 20 |
| $5-7$ | 10 | 6 | 60 |
| $7-9$ | 10 | 8 | 80 |
| $9-11$ | 7 | 10 | 70 |
| $11-13$ | 8 | 12 | 96 |
|  | $\sum f_{i}=40$ |  | $\sum f_{i} x_{i}=326$ |

Mean

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{326}{40}=8.15
$$

64. Find the mode of the following data :

| Class : | $\begin{aligned} & 0- \\ & 20 \end{aligned}$ | $\begin{aligned} & 20- \\ & 40 \end{aligned}$ | $\begin{aligned} & 40- \\ & 60 \end{aligned}$ | $\begin{aligned} & 60- \\ & 80 \end{aligned}$ | $\begin{aligned} & 80- \\ & 100 \end{aligned}$ | $\begin{aligned} & 100- \\ & 120 \end{aligned}$ | $\begin{aligned} & 120- \\ & 140 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 6 | 8 | 10 | 12 | 6 | 5 | 3 |

Ans :
[Board 2020 Delhi Standard]
Class $60-80$ has the maximum frequency 12 , therefore this is model class.

Hence, $\quad l=60, f_{1}=12, f_{0}=6, f_{2}=6$ and $h=20$
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =60+\frac{12-10}{2 \times 12-10-6} \times 20 \\
& =60+\frac{2 \times 20}{24-16} \\
& =60+\frac{40}{8} \quad=60+5
\end{aligned}
$$

$=65$
65. The mode of the following frequency distribution is 36. Find the missing frequency $f$.

| Class | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 8 | 10 | $f$ | 16 | 12 | 6 | 7 |

Ans :
[Board 2020 OD Basic]
Mode is 36 which lies in class $30-40$, therefore this is model class.

Here, $\quad f_{0}=f, f_{2}=16, f_{2}=12, l=30$ and $h=10$
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
36 & =30+\frac{16-f}{2 \times 16-f-12} \times 10
\end{aligned}
$$

$$
\begin{aligned}
6 & =\frac{16-f}{20-f} \times 10 \\
120-6 f & =160-10 f \\
4 f & =40 \Rightarrow f=10
\end{aligned}
$$

Thus (d) is correct option.
66. Find the median for the given frequency distribution :

| Class | $40-$ <br> 45 | $45-$ <br> 50 | $50-$ <br> 55 | $55-$ <br> 60 | $60-$ <br> 65 | $65-$ <br> 70 | $70-$ <br> 75 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 2 | 3 | 8 | 6 | 6 | 3 | 2 |

Ans:
[Board 2020 OD Basic]

| Class | Frequency | c.f. |
| :---: | :---: | :---: |
| $40-45$ | 2 | 2 |
| $45-50$ | 3 | 5 |
| $50-55$ | 8 | 13 |
| $55-60$ | 6 | 19 |
| $60-65$ | 6 | 25 |
| $65-70$ | 3 | 28 |
| $70-75$ | 2 | 30 |
|  | $N=30$ |  |

$$
\text { We have } \quad N=30 ; \frac{N}{2}=15
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 19 and the corresponding class is $55-60$. Thus median class is 55-60.

Now $\quad l=55, f=6, F=13, h=5$
Median, $\quad M_{d}=l+\left(\frac{\frac{N}{2}-F}{f}\right) \times h$

$$
\begin{aligned}
& =55+\left(\frac{15-13}{6}\right) \times 5 \\
& =55+\frac{5}{3}=55+1.67 \\
& =56.67
\end{aligned}
$$

67. Find the mean of the following distribution :

| Class | $10-$ <br> 25 | $25-$ <br> 40 | $40-$ <br> 55 | $55-$ <br> 70 | $70-$ <br> 85 | $85-$ <br> 100 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 2 | 3 | 7 | 6 | 6 | 6 |

Ans :
[Board 2020 Delhi Basic]
Let $a=62.5$ be assumed mean.

| Class <br> Interval | Frequency <br> $\left(f_{i}\right)$ | c.f. | $x_{i}$ | $U_{i}=\frac{x-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $10-25$ | 2 | 2 | 17.5 | -3 | -6 |
| $25-40$ | 3 | 5 | 32.5 | -2 | -6 |
| $40-55$ | 7 | 12 | 47.5 | -1 | -7 |
| $55-70$ | 6 | 18 | $62.50=$ <br> $a$ | 0 | 0 |
| $70-85$ | 6 | 24 | 77.5 | 1 | 6 |
| $85-100$ | 6 | 30 | 92.5 | 2 | 12 |
|  | $\sum f_{i}=30$ |  |  |  | $\sum f_{i} u_{i}=-1$ |

$$
\text { Mean, } \quad \begin{aligned}
\bar{x} & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =62.5+\frac{-1}{30} \times 15 \\
& =62.5-\frac{1}{2}=62.5-0.5=62
\end{aligned}
$$

68. Find the mean of the following data :

| Class | $0-$ <br> 20 | $20-$ <br> 40 | $40-$ <br> 60 | $60-$ <br> 80 | $80-$ <br> 100 | $100-$ <br> 120 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 20 | 35 | 52 | 44 | 38 | 31 |

Ans :
Let $a=70$ be assumed mean.

| C.I. | Frequency $f$ | $x_{i}$ | $u_{i}=\frac{x_{i}-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $0-20$ | 20 | 10 | -3 | -60 |
| $20-40$ | 35 | 30 | -2 | -70 |
| $40-60$ | 52 | 50 | -1 | -52 |
| $60-80$ | 44 | 70 | 0 | 0 |
| $80-100$ | 38 | 90 | 1 | 38 |
| $100-120$ | 31 | 110 | 2 | 62 |
|  | $\sum f_{i}=220$ |  |  | $\sum f_{i} u_{i}=-82$ |

Mean,

$$
\begin{aligned}
\bar{x} & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =70+\frac{(-82)}{220} \times 20 \\
& =70-\frac{82}{11}=70-7.45=62.55
\end{aligned}
$$

69. Find the mode of the following frequency distribution.

| Class | $0-$ | $10-$ | $20-$ | $30-$ | $40-$ | $50-$ | $60-$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | 10 | 20 | 30 | 40 | 50 | 60 | 70 |

| Frequency | 8 | 10 | 10 | 16 | 12 | 6 | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Ans :
[Board 2019 Delhi]
Class 30-40 has the maximum frequency 16 , therefore this is model class.
We have $l=30, f_{0}=10, f_{1}=16, f_{2}=12, h=10$
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =30+\left(\frac{16-10}{2 \times 16-10-12}\right) \times 10 \\
& =30+\left(\frac{6}{32-22}\right. \\
& =30+\left(\frac{6}{10}\right) \times 10 \\
& =30+6=36
\end{aligned}
$$

70. The data regarding marks obtained by 48 students of a class in a class test is given below. Calculate the modal marks of students.

| Marks <br> obtained | $0-5$ | $5-$ <br> 10 | $10-$ <br> 15 | $15-$ <br> 20 | $20-$ <br> 25 | $25-$ <br> 30 | $30-$ <br> 35 | $35-$ <br> 40 | $40-$ <br> 45 | $45-$ <br> 50 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> students | 1 | 0 | 2 | 0 | 0 | 10 | 25 | 7 | 2 | 1 |

Ans :
[Board Term-1, 2015]
Class 30-35 has the maximum frequency 25 , therefore this is model class.
Now $l=30, f_{1}=25 f_{0}=10, f_{2}=7, h=5$
Mode $\quad M_{o}=l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) \times h$

$$
\begin{aligned}
& =30+\frac{25-10}{50-10-7} \times 5 \\
& =30+2.27 \text { or } 32.27 \text { approx. }
\end{aligned}
$$

71. Find the value of $\lambda$, if the mode of the following data is 20 :
$15,20,25,18,13,15,25,15,18,17,20,25,20, \lambda, 18$.
Ans :
[Board Term-1, 2015]
First we prepare the following table as discrete frequency distribution.

| $x_{i}$ | $f_{i}$ |
| :--- | :--- |
| 13 | 1 |
| 15 | 3 |
| 17 | 1 |
| 18 | 3 |

| 20 | 3 |
| :--- | :--- |
| $\lambda$ | 1 |
| 25 | 3 |

Frequency of 20 must be highest to be mode of the frequency distribution, $\lambda=20$.
72. The mean and median of 100 observation are 50 and 52 respectively. The value of the largest observation is 100 . It was later found that it is 110 . Find the true mean and median.
Ans :
[Board Term-1 2016]

Mean,

$$
\begin{aligned}
M & =\frac{\sum f x}{\sum f} \\
50 & =\frac{\sum f x}{100}
\end{aligned}
$$

$$
\sum f x=5000
$$

Correct,

$$
\begin{aligned}
\sum f x^{\prime} & =5000-100+110 \\
& =5010 \\
& =\frac{5010}{100} \\
& =50.1
\end{aligned}
$$

Correct Mean $=\frac{5010}{100}$

Median will remain same i.e median is 52 .
73. Find the arithmetic mean of the following frequency distribution :

| $x_{i}$ | 3 | 4 | 5 | 7 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $f_{i}$ | 3 | 4 | 8 | 5 | 10 |

Ans :
[Board Term-1, 2015]
We prepare the following table to fine mean.

| $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- |
| 3 | 3 | 9 |
| 4 | 4 | 16 |
| 5 | 8 | 40 |
| 7 | 5 | 35 |
| 10 | 10 | 100 |
| Total | $\sum f_{i}=30$ | $\sum f_{i} x_{i}=200$ |

Mean,
$M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{200}{30}=6.67$
74. Given below is the distribution of weekly pocket money received by students of a class. Calculate the
pocket money that is received by most of the students.

| Pocket <br> Money <br> (in Rs.) | $0-20$ | $20-$ <br> 40 | $40-$ <br> 60 | $60-$ <br> 80 | $80-$ <br> 100 | $100-$ <br> 120 | $120-$ <br> 140 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students. | 2 | 2 | 3 | 12 | 18 | 5 | 2 |

Ans :
[Board Term-1 2015]

| Class Interval | Frequency |
| :--- | :--- |
| $0-20$ | 2 |
| $20-40$ | 2 |
| $40-60$ | 3 |
| $60-80$ | 12 |
| $80-100$ | 18 |
| $100-120$ | 5 |
| $120-140$ | 2 |
| Total | 44 |

Class 80-100 has the maximum frequency 18 , therefore this is model class.

We have $l=80, f_{1}=18, f_{2}=5, f_{0}=12, h=20$

$$
\text { Mode, } \quad \begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =80+\left(\frac{18-12}{36-12-5}\right) \times 20 \\
& =80+\frac{6}{19} \times 20 \\
& =80+6.31 \\
& =86.31
\end{aligned}
$$

75. Find the mean of the following distribution :

| Class <br> interval | $0-6$ | $6-12$ | $12-18$ | $18-24$ | $24-30$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 4 | 1 | 6 | 4 |

## Ans :

[Board Term-1 2015]

| $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- |
| 3 | 5 | 15 |

| 9 | 4 | 36 |
| :--- | :--- | :--- |
| 15 | 1 | 15 |
| 21 | 6 | 126 |
| 27 | 4 | 108 |
| Total | $\sum f_{i}=20$ | $\sum f_{i} x_{i}=300$ |

Mean

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{300}{20}=15
$$

76. The following table gives the life time in days of 100 bulbs :

| Life <br> time in <br> days | Less <br> than <br> 50 | Less <br> than <br> 100 | Less <br> than <br> 150 | Less <br> than <br> 200 | Less <br> than <br> 250 | Less <br> than <br> 300 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of Bulbs | 8 | 23 | 55 | 81 | 93 | 100 |

Change the above distribution as frequency distribution.

Ans :
[Board Term-1 2012]

| Life time in days <br> (Class Interval) | Number of Bulbs <br> (Frequency) |
| :--- | :--- |
| $0-50$ | 8 |
| $50-100$ | 15 |
| $100-150$ | 32 |
| $150-200$ | 26 |
| $150-200$ | 12 |
| $150-200$ | 7 |
| Total | 100 |

77. Find the unknown values in the following table:

| Class Interval | Frequency | Cumulative <br> Frequency |
| :--- | :--- | :--- |
| $0-10$ | 5 | 5 |
| $10-20$ | 7 | $x_{1}$ |
| $20-30$ | $x_{2}$ | 18 |
| $30-40$ | 5 | $x_{3}$ |
| $40-50$ | $x_{4}$ | 30 |

Ans:
[Board Term-1 2016]
We have

$$
\begin{aligned}
& x_{1}=5+7=12 \\
& x_{2}=18-x_{1}=18-12=6 \\
& x_{3}=18+5=23
\end{aligned}
$$

and

$$
x_{4}=30-x_{3}=30-23=7
$$

78. Calculate the median from the following data:

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> Students | 5 | 15 | 30 | 8 | 2 |

## Ans :

[Board Term-1 2012]
We prepare following cumulative frequency table to find median class.

| Marks | No. of students | c.f. |
| :--- | :--- | :--- |
| $0-10$ | 5 | 5 |
| $10-20$ | 15 | 20 |
| $20-30$ | 30 | 50 |
| $30-40$ | 8 | 58 |
| $40-50$ | 2 | 60 |
|  | $N=60$ |  |

We have $\quad N=60 ; \frac{N}{2}=30$
Cumulative frequency just greater than $\frac{N}{2}$ is 50 and the corresponding class is $20-30$. Thus median class is $20-20$.

Now $\quad l=20, f=30, F=20, h=10$
Median, $\quad M_{d}=l+\left(\frac{\frac{N}{2}-F}{f}\right) \times h$

$$
=20+\left(\frac{30-20}{30}\right) \times 10
$$

$$
=20+\frac{100}{30}=20+\frac{10}{3}
$$

$$
=20+3.33
$$

Thus

$$
M d=23.33
$$

79. Find the sum of the lower limit of the median class and the upper limit of the modal class :

| Classes | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 1 | 3 | 5 | 9 | 7 | 3 |

Ans:
[Board Term-1 2012]
We prepare following cumulative frequency table to find median class.

| Class | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 1 | 3 | 5 | 9 | 7 | 3 |

| Cumulative <br> Frequency | 1 | 4 | 9 | 18 | 25 | 28 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

We have

$$
N=28 ; \frac{N}{2}=\frac{28}{2}=14
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 18 and the corresponding class is $40-50$.
Thus median class is $40-50$.
Lower limit is 40 and upper limit is 5 . Their sum is $=40+50=90$
80. Write the relationship connecting three measures of central tendencies. Hence find the median of the give data if mode is 24.5 and mean is 29.75 .
Ans:
[Board Term-1 2012]
Mode,

$$
M_{o}=24.5
$$

and mean,

$$
M=29.75
$$

The relationship connecting measures of central tendencies is,

Thus

$$
3 M_{d}=M_{o}+2 M
$$

$$
\begin{aligned}
3 M_{d} & =24.5+2 \times 5950 \\
& =24.5+59.50=84.0
\end{aligned}
$$

Median

$$
M_{d}=\frac{84}{3}=28
$$

81. The following distribution shows the marks scored by 140 students in an examination. Calculate the mode of the distribution :

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> students | 20 | 24 | 40 | 36 | 20 |

Ans :
[Board Term-1 2012]
Class 20-30 has the maximum frequency 40, therefore this is model class.

$$
\text { Here, } \quad \begin{aligned}
l=20, f_{1} & =40, f_{0}=24, f_{2}=36, h=10 \\
\text { Mode, } \quad & \\
& =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =20+\frac{(40-24)}{80-24-36} \times 10 \\
& =20+\frac{16 \times 10}{20}=28
\end{aligned}
$$

82. Find the unknown entries $a, b, c, d$ in the following
distribution of heights of students in a class :

| Height (in cm) | Frequency | Cumulative <br> Frequency |
| :--- | :--- | :--- |
| $150-155$ | 12 | 12 |
| $155-160$ | $a$ | 25 |
| $160-165$ | 10 | $b$ |
| $165-170$ | $c$ | 43 |
| $170-175$ | 5 | 48 |
| $175-180$ | 2 | $d$ |

## Ans :

[Board Term-1 2012]
From the table,

$$
\begin{aligned}
12+a & =25 \Rightarrow a=25-12=13 \\
25+10 & =b \Rightarrow b=35 \\
b+c & =43 \Rightarrow c=43-b=13-35=8
\end{aligned}
$$

and $48+2=d \Rightarrow d=50$
83. Find the mode of the following distribution :

| Classes | $25-$ <br> 30 | $30-$ <br> 35 | $35-$ <br> 40 | $40-$ <br> 45 | $45-$ <br> 50 | $50-$ <br> 55 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 25 | 34 | 50 | 42 | 38 | 14 |

Ans :
Class 35-40 has the maximum frequency 50 , therefore this is model class.

Now $\quad l=35, f_{1}=50, f_{2}=42, f_{0}=34, h=5$
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =35+\frac{50-34}{100-34-42} \times 5 \\
& =35+\frac{16 \times 5}{24}=38.33
\end{aligned}
$$

84. Find $x$ and $y$ from the following cumulative frequency distribution :

| Classes | Frequency | c.f. |
| :--- | :--- | :--- |
| $0-8$ | 15 | 15 |
| $8-16$ | $x$ | 28 |
| $16-24$ | 15 | 43 |
| $24-32$ | 18 | $y$ |
| $32-40$ | 09 | 70 |

Ans:
[Board Term-1 2012]
From the cumulative frequency distribution,

$$
15+x=28 \Rightarrow x=28-15=13
$$

and

$$
43+18=y \Rightarrow y=61
$$

Hence,

$$
x=13 \text { and } y=61
$$

85. The frequency distribution of agricultural holdings in a village below :

| Area of land (in <br> hectare) | $1-3$ | $3-5$ | $5-7$ | $7-9$ | $9-11$ | $11-13$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> families | 20 | 45 | 80 | 55 | 40 | 12 |

Find the modal agricultural holding of the village.
Ans :
[Board Term-1 2012]
Class 5-7 has the maximum frequency 80 , therefore this is model class.

$$
\text { Here } \quad l=5, f_{1}=80, f_{0}=45, h=2, f_{2}=55
$$

$$
\text { Mode, } \quad \begin{aligned}
\quad M_{o} & =l+\frac{\left(f_{1}-f_{0}\right)}{2 f_{1}-f_{0}-f_{2}} \times h \\
& =5+\frac{80-45}{160-45-55} \times 2=5+\frac{35 \times 2}{60} \\
& =6.17
\end{aligned}
$$

86. Write the median class of the following distribution :

| Classes | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 4 | 4 | 8 | 10 | 12 | 8 | 4 |

Ans:
[Board Term-1 2012]
We prepare following cumulative frequency
table to find median class.

| Classes | Frequency | Less than c.f. |
| :--- | :--- | :--- |
| $0-10$ | 4 | 4 |
| $10-20$ | 4 | 8 |
| $20-30$ | 8 | 16 |
| $30-40$ | 10 | 26 |
| $40-50$ | 12 | 38 |
| $50-60$ | 8 | 46 |
| $60-70$ | 4 | 50 |
|  | $N=50$ |  |

We have

$$
N=50 ; \frac{N}{2}=25
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 26 and the corresponding class is $30-40$. Thus median class is $20-20$.
87. The following are the ages of 300 patients getting medical treatment in a hospital on a particular day :

| Age (in <br> years) | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 60 | 42 | 55 | 70 | 53 | 20 |

Form the "less than type" cumulative frequency distribution table.

## Ans :

[Board Term-1 2012]

| Age | Number of Patients |
| :--- | :--- |
| Less then 20 | 60 |
| Less then 30 | 102 |
| Less then 40 | 157 |
| Less then 50 | 227 |
| Less then 60 | 280 |
| Less then 70 | 300 |

88. Find the mean of the following data :

| Class | Frequency |
| :--- | :--- |
| $0.5-5.5$ | 13 |
| $5.5-10.5$ | 16 |
| $10.5-15.5$ | 22 |
| $15.5-20.5$ | 18 |
| $20.5-25.5$ | 11 |

Ans :
[Board Term-1 2012]
We prepare following table to find mean.

| Class | $x_{i}=\frac{l_{1}+l_{2}}{2}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0.5-5.5$ | 3 | 13 | 39 |
| $5.5-10.5$ | 8 | 16 | 128 |
| $10.5-15.5$ | 13 | 22 | 286 |
| $15.5-20.5$ | 18 | 18 | 324 |
| $20.5-25.5$ | 23 | 11 | 253 |
|  | Total | $\sum f_{i}=80$ | 1,030 |

Mean $\quad \bar{x}=\frac{\sum x_{i} f_{i}}{\sum f_{i}}=\frac{1,030}{80}=12.9$
89. Find the mean number of plants per house from the following data :

| Number <br> of plants | $0-2$ | $2-4$ | $4-6$ | $6-8$ | $8-10$ | $10-12$ | $12-14$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of houses | 1 | 2 | 1 | 5 | 6 | 2 | 3 |

Ans :
[Board Term-1 2012]
We prepare following table to find mean.

| Class | $x_{i}=\frac{l_{1}+l_{2}}{2}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-2$ | 1 | 1 | 1 |
| $2-4$ | 3 | 2 | 6 |
| $4-6$ | 5 | 1 | 5 |
| $6-8$ | 7 | 5 | 35 |
| $8-10$ | 9 | 6 | 54 |
| $10-12$ | 11 | 2 | 22 |
| $12-14$ | 13 | 3 | 39 |
|  | Total | 20 | 162 |

Mean

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{162}{20}=8.1
$$

n189

Ans:
[Board Term-1 2012]
We prepare following table to find mean.

| Classes | $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-6$ | 3 | 7 | 21 |
| $6-12$ | 9 | 5 | 45 |
| $12-18$ | 15 | 10 | 150 |
| $18-24$ | 21 | 12 | 252 |
| $24-30$ | 27 | 6 | 162 |
|  |  | $\sum f_{i}=40$ | $\sum f_{i} x_{i}=630$ |

Mean

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{630}{40}=15.75
$$

93. The mean of the following frequency distribution is 25 . Find the value of $p$.

| Class <br> interval | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 4 | 6 | 10 | 6 | $p$ |

## Ans :

[Board Term-1 2015]
We prepare following table to find mean.

| Class- <br> Interval | Mid-Point <br> $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-10$ | 5 | 4 | 20 |
| $10-20$ | 15 | 6 | 90 |
| $20-30$ | 25 | 10 | 250 |
| $30-40$ | 35 | 6 | 210 |
| $40-50$ | 45 | $p$ | $45 p$ |
|  |  | $26+p$ | $570+45 p$ |

$$
\text { We have } \left.\begin{array}{rl}
M & =\frac{\sum f_{i} x_{i}}{\sum f_{i}} \\
25 & =\frac{570+45 p}{26+p} \\
650+25 p & =570+45 p \\
650-570 & =45 p-25 p \\
\text { Thus } & p
\end{array}\right)
$$

94. The data regarding the height of 50 girls of class X of a school is given below :

| Height <br> (in cm) | $120-$ <br> 130 | $130-$ <br> 140 | $140-$ <br> 150 | $150-$ <br> 160 | $160-$ <br> 170 | Total |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

| Number <br> of girls | 2 | 8 | 12 | 20 | 8 | 50 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Change the above distribution to 'more than type' distribution.

Ans :
[Board Term-1 2012]

| Heights | No. of girls |
| :--- | :--- |
| more than 120 | 50 |
| more than 130 | 48 |
| more than 140 | 40 |
| more than 150 | 28 |
| more than 160 | 6 |

95. Convert the following distribution to more than type, cumulative frequency distribution :

| Class | $50-60$ | $60-70$ | $70-80$ | $80-90$ | $90-100$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 12 | 18 | 10 | 15 | 5 |

## Ans :

[Board Term-1 2012]
We prepare following cumulative frequency table.

| Class | Cumulative Frequency |
| :--- | :--- |
| More than 50 | 60 |
| More than 60 | 48 |
| More than 70 | 30 |
| More than 80 | 20 |
| More than 90 | 5 |

96. Convert the following cumulative distribution to a frequency distribution :

| Height <br> (in cm) | less <br> than <br> 140 | less <br> than <br> 145 | less <br> than <br> 150 | less <br> than <br> 155 | less <br> than <br> 160 | less <br> than <br> 165 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 4 | 11 | 29 | 40 | 46 | 51 |

Ans :
[Board Term-1 2012]
We prepare following cumulative frequency table.

| Class | Frequency | Cumulative <br> Frequency |
| :--- | :--- | :--- |
| $135-140$ | 4 | 4 |

| $140-145$ | 7 | 11 |
| :--- | :--- | :--- |
| $145-150$ | 18 | 29 |
| $150-155$ | 11 | 40 |
| $155-160$ | 6 | 46 |
| $160-165$ | 5 | 51 |

97. Prepare a cumulative frequency distribution of 'more than type' for the following data :

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 3 | 8 | 15 | 7 | 5 |

Ans :
[Board Term-1 2012]
We prepare following cumulative frequency table.

| Marks | Cumulative Frequency |
| :--- | :--- |
| More than 0 | 38 |
| More than 10 | 35 |
| More than 20 | 27 |
| More than 30 | 12 |
| More than 40 | 5 |

98. Change the following distribution to 'more than type' of distribution :

| Daily <br> income (in <br> Rs.) | $100-$ <br> 120 | $120-$ <br> 140 | $140-$ <br> 160 | $160-$ <br> 180 | $180-$ <br> 200 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> students | 12 | 14 | 8 | 6 | 10 |

Ans :
[Board Term-1 2012]
We prepare following cumulative frequency table.

| Daily income | No. of workers |
| :--- | :--- |
| More than 100 | 50 |
| More than 120 | 38 |
| More than 140 | 24 |
| More than 160 | 16 |
| More than 180 | 10 |

99. Convert the following data into 'more than type'
distribution :

| Class | $50-$ <br> 55 | $55-$ <br> 60 | $60-$ <br> 65 | $65-$ <br> 70 | $70-$ <br> 75 | $75-$ <br> 80 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 2 | 8 | 12 | 24 | 38 | 16 |

Ans :
[Board Term-1 2012]
We prepare following cumulative frequency table.

| Class | Frequency |
| :--- | :--- |
| More than 50 | 100 |
| More than 55 | 98 |
| More than 60 | 90 |
| More than 65 | 78 |
| More than 70 | 54 |
| More than 75 | 16 |

100. Given below is a frequency distribution table showing daily income of 100 workers of a factory :

| Daily <br> income of <br> workers <br> (in Rs.) | $200-$ <br> 300 | $300-$ <br> 400 | $400-$ <br> 500 | $500-$ <br> 600 | $600-$ <br> 700 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> workers | 12 | 18 | 35 | 20 | 15 |

Convert this table to a cumulative frequency distribution table of 'more than type'.
Ans:
[Board Term-1 2016]
Cumulative frequency distribution table
(more than type)

| Daily income of workers <br> (in Rs.) | Number of workers |
| :--- | :--- |
| More than 200 | 100 |
| More than 300 | 88 |
| More than 400 | 70 |
| More than 500 | 35 |
| More than 600 | 15 |
| More than 700 | 0 |

101. The given distribution shows the number of runs scored by the batsmen in inter-school cricket matches

| Runs <br> scored | $0-50$ | $50-$ <br> 100 | $100-$ <br> 150 | $150-$ <br> 200 | $200-$ <br> 250 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> batsmen | 4 | 6 | 9 | 7 | 5 |

Draw a 'more than type' ogive for the above data .
Ans:
[Board Term-1 2015]
Units on $x$ - axis $1 \mathrm{~cm}=50, y$-axis $1 \mathrm{~cm}=5$

| More than | c.f. |
| :--- | :--- |
| 0 | 31 |
| 50 | 27 |
| 100 | 21 |
| 150 | 12 |
| 200 | 5 |

## THREE MARKS QUESTIONS

102. A TV reporter was given a task to prepare a report on the rainfall of the city Dispur of Indian in a particular year. After collecting the data, he analysed the data and prepared a report on the rainfall of the city, Using this report, he drew the following graph of a particular
time period of 66 days

Based on the above graph, answer the following questions :
(i) Identify less than type ogive and more than type ogive from the given graph.
(ii) Find the median rainfall of Dispur.
(iii) Obtain the Mode of the data if mean rainfall is 23.4 cm

Ans :
[Board 2020 SQP Standard]
(i) Curve-1 shows less than ogive and curve-2 shows more than ogive.
(ii) The abscissa of intersecting point of less than and more than ogive give the median. Thus median is 21 cm .
(iii) Mode of data,

$$
\begin{aligned}
M_{o} & =3 M_{d}-2 M \\
& =3 \times 21-2 \times 23.4 \\
& =63-46.8=16.2 \mathrm{~cm}
\end{aligned}
$$

103. The following table gives production yield per hectare (in quintal) of wheat of 100 farms of a village :

| Production <br> yield/hect. | $40-$ <br> 45 | $45-$ <br> 50 | $50-$ <br> 55 | $55-$ <br> 60 | $60-$ <br> 65 | $65-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of farms | 4 | 6 | 16 | 20 | 30 | 24 |

Change the distribution to a more than type distribution and draw its ogive.
Ans :
[Board 2020 Delhi STD, OD STD]

| Production yield/hectare | c.f. |
| :--- | :--- |
| more than 40 | 100 |
| more than 45 | 96 |

| Production yield/hectare | c.f. |
| :--- | :--- |
| more than 50 | 90 |
| more than 55 | 74 |
| more than 60 | 54 |
| more than 65 | 24 |

104. Compute the mode for the following frequency distribution:

| Size of items <br> (in cm$)$ | $0-$ <br> 4 | $4-$ <br> 8 | $8-$ <br> 12 | $12-$ <br> 16 | $16-$ <br> 20 | $20-$ <br> 24 | $24-$ <br> 28 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 7 | 9 | 17 | 12 | 10 | 6 |

Ans :
[Board 2020 OD Standard]
Class 12-16 has the maximum frequency 17 , therefore this is model class.

We have $l=12, f_{1}=17, f_{0}=9, f_{2}=12$ and $h=4$
Mode $\quad M_{o}=l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) \times h$

$$
\begin{aligned}
& =12+\left(\frac{17-9}{2 \times 17-9-12} \times 4\right. \\
& =12+\frac{8 \times 4}{13} \\
& =12+2.46=14.46
\end{aligned}
$$

105.The mean of the following frequency distribution is 18. The frequency $f$ in the class interval 19-21 is
missing. Determine $f$.

| Class <br> interval | $11-$ <br> 13 | $13-$ <br> 15 | $15-$ <br> 17 | $17-$ <br> 19 | $19-$ <br> 21 | $21-$ <br> 23 | $23-$ <br> 25 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 3 | 6 | 9 | 13 | $f$ | 5 | 4 |

Ans :
[Board 2020 OD Standard]

| Class | Class Mark | Frequency | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $11-13$ | 12 | 3 | 36 |
| $13-15$ | 14 | 6 | 84 |
| $15-17$ | 16 | 9 | 144 |
| $17-19$ | 18 | 13 | 234 |
| $19-21$ | 20 | $f$ | $20 f$ |
| $21-23$ | 22 | 5 | 110 |
| $23-25$ | 24 | 4 | 96 |
|  | Total | $40+f$ | $704+20 f$ |

$$
\text { We have } \begin{aligned}
\sum f_{i} & =40+f \\
\sum f_{i} x_{i} & =704+20 f \\
\text { Mean, } \quad & \\
M & =\frac{\sum f_{i} x_{i}}{\sum f_{i}} \\
18 & =\frac{704 \times 20 f}{40+f} \\
720+18 f & =704+20 f \\
f & =8
\end{aligned}
$$

106.Find the mode of the following frequency distribution

| Class | $15-$ <br> 20 | $20-$ <br> 25 | $25-$ <br> 30 | $30-$ <br> 35 | $35-$ <br> 40 | $40-$ <br> 45 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 3 | 8 | 9 | 10 | 3 | 2 |

Ans:
[Board 2020 OD Standard]
Class 30-35 has the maximum frequency 10 , therefore this is model class.

Now $\quad l=30, f_{0}=9, f_{1}=10, f_{2}=3$ and $h=5$
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =30+\left(\frac{10-9}{2 \times 10-9-3}\right) \times 5 \\
& =30+\frac{5}{8} \\
& =30+0.625=30.625
\end{aligned}
$$

107.The marks obtained by 110 students in an examination are given below

| Marks | $30-$ <br> 35 | $35-$ <br> 40 | $40-$ <br> 45 | $45-$ <br> 50 | $50-$ <br> 55 | $55-$ <br> 60 | $60-$ <br> 65 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> Students | 14 | 16 | 28 | 23 | 18 | 8 | 3 |

Find the mean marks of the students.
Ans :
[Board 2019 OD Standard]

| Marks | $f$ | $x_{i}$ | $u_{i}=\frac{x_{i}-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $30-35$ | 14 | 32.5 | -3 | -42 |
| $35-40$ | 16 | 37.5 | -2 | -32 |
| $40-45$ | 28 | 42.5 | -1 | -28 |
| $45-50$ | 23 | 47.5 | 0 | 0 |
| $50-55$ | 18 | 52.5 | 1 | 18 |
| $55-60$ | 8 | 57.5 | 2 | 16 |
| $60-65$ | 3 | 62.5 | 3 | 9 |
|  | $\sum f_{i}=110$ |  |  | $\sum f_{i} u_{i}=-59$ |

Let $a$ be assumed mean,

$$
a=47.5
$$

Mean $\quad M=a+\frac{\sum f_{i} u_{i}}{N} \times h$

$$
\begin{aligned}
& =47.5+\frac{(-59)}{110} \times 5 \\
& =47.5-2.682=44.818
\end{aligned}
$$

n207
108. The table below shows the daily expenditure on food of 25 households in a locality. Find the mean daily expenditure on food.

| Daily expenditure <br> (in ₹) | $100-$ <br> 150 | $150-$ <br> 200 | $200-$ <br> 250 | $250-$ <br> 300 | $300-$ <br> 350 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> households | 4 | 5 | 12 | 2 | 2 |

Ans :
[Board 2019 Delhi]
Let $a=225$ be assumed mean,

| Daily <br> Expenditure <br> $($ in ₹ $)$ | No. of <br> household <br> $\left(f_{i}\right)$ | $\left(x_{i}\right)$ | $u_{i}=\frac{x_{i}-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $100-150$ | 4 | 125 | -2 | -8 |
| $150-200$ | 5 | 175 | -1 | -5 |

| $200-250$ | 12 | 225 | 0 | 0 |
| :--- | :--- | :--- | :--- | :--- |
| $250-300$ | 2 | 275 | 1 | 2 |
| $300-350$ | 2 | 325 | 2 | 4 |
|  | $\sum f_{i}=25$ |  |  | $\sum f_{i} u_{i}$ <br> $=-7$ |

Mean,

$$
\begin{aligned}
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =225+\frac{(-7)}{25} \times 50 \\
& =225-14=211
\end{aligned}
$$

Hence, mean of daily expenditure on food is ₹ 211 .
109.The mean of the following distribution is 48 and sum of all the frequency is 50 . Find the missing frequencies $x$ and $y$.

| Class | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 8 | 6 | $x$ | 11 | $y$ |

Ans :
[Board Term-1 2015, 2016]
We prepare following table to find mean.

| C.I. | $f_{1}$ | $x_{i}$ | $u_{i}=\frac{x_{i}-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $20-30$ | 8 | 25 | -2 | -16 |
| $30-40$ | 6 | 35 | -1 | -6 |
| $40-50$ | $x$ | $45=a$ | 0 | 0 |
| $50-60$ | 11 | 55 | 1 | 11 |
| $60-70$ | $y$ | 65 | 2 | $2 y$ |
| Total | $\sum f_{i}=$ <br> $25+x+y$ |  |  | $\sum f_{i} u_{i}=$ <br> $2 y-11$ |

$$
\begin{aligned}
& \text { Mean, } \begin{aligned}
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
48 & =45+\frac{2 y-11}{50} \times 10 \\
48-45 & =\frac{2 y-11}{5} \\
3 \times 5 & =2 y-11 \\
15 & =2 y-11 \Rightarrow y=13 \\
\text { Also } \quad \sum f_{i} & =25+x+y=50 \\
x+y & =25 \\
x & =25-13=12
\end{aligned}
\end{aligned}
$$

Thus $x=12$ and $y=13$
110.Find the mean of the following distribution :

| Height <br> (in cm) | Less <br> than <br> 75 | Less <br> than <br> 100 | Less <br> than <br> 125 | Less <br> than <br> 150 | Less <br> than <br> 175 | Less <br> than <br> 200 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of <br> students | 5 | 11 | 14 | 18 | 21 | 28 |
| Height <br> (in cm) | Less <br> than <br> 225 | Less <br> than <br> 250 | Less <br> than <br> 275 | Less <br> than <br> 300 |  |  |
| No. of <br> students | 33 | 37 | 45 | 50 |  |  |

Ans:
[Board Term-1 2016]
We prepare following table to find mean.

| Class <br> Interval <br> Height <br> (in cm) | Frequency <br> $f_{i}$ | $x_{i}$ | $u_{i}=$ <br> $x_{i}-a$ <br> $h$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $50-75$ | 5 | 62.5 | -5 | -25 |
| $75-100$ | 6 | 87.5 | -4 | -24 |
| $100-125$ | 3 | 112.5 | -3 | -9 |
| $125-150$ | 4 | 137.5 | -2 | -8 |
| $150-175$ | 3 | 162.5 | -1 | -3 |
| $175-200$ | 7 |  | 0 | 0 |
| $200-225$ | 5 | 212.5 | 1 | 5 |
| $225-250$ | 4 | 237.5 | 2 | 8 |
| $250-275$ | 8 | 262.5 | 3 | 24 |
| $275-300$ | 5 | 287.5 | 4 | 20 |
|  | $\sum f_{i}=50$ |  |  | $\sum f_{i} y_{i}$ |
|  |  |  |  | $=-12$ |

Here, $\sum f_{i} u_{i}=-12 ; \sum f_{i}=50, h=25$
Mean

$$
\begin{aligned}
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =187.5+\frac{-12}{50} \times 25 \\
& =187.5-6=181.5
\end{aligned}
$$

111.Following frequency distribution shows the expenditure on milk of 30 households in a locality :

| Daily <br> expenditure <br> on milk (Rs.) | $0-30$ | $30-60$ | $60-90$ | $90-120$ | $120-150$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> households | 5 | 6 | 9 | 6 | 4 |

Find the mode for the above data.
Ans :
[Board Term-1 2016]
Class $60-90$ has the maximum frequency 9 , therefore this is model class.

Here, $l_{1}=60, f_{1}=9, f_{0}=6, f_{2}=6$ and $h=30$.
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =60+\left(\frac{9-6}{2 \times 9-6-6}\right) \times 30 \\
& =60+\frac{30 \times 3}{6}=60+15=75
\end{aligned}
$$

112.The weekly expenditure of 500 families is tabulated below :

| Weekly Expenditure(Rs.) | Number of families |
| :--- | :--- |
| $0-1000$ | 150 |
| $1000-2000$ | 200 |
| $2000-3000$ | 75 |
| $3000-4000$ | 60 |
| $4000-5000$ | 15 |

Find the median expenditure.
Ans :
[Board Term-1 2015]
We prepare following cumulative frequency table to find median class.

| Expenditure | $f$ (families) | c.f. |
| :--- | :--- | :--- |
| $0-1000$ | 150 | 150 |
| $1000-2000$ | 200 | 350 |
| $2000-3000$ | 75 | 425 |
| $3000-4000$ | 60 | 485 |
| $4000-5000$ | 15 | 500 |
|  | $\sum f=500$ |  |

We have

$$
N=500 ; \frac{N}{2}=250
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 350 and the corresponding class is 1000-2000. Thus median class is 1000-2000.

Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =1000+\frac{250-150}{200} \times 1000 \\
& =1000+500=1,500
\end{aligned}
$$

Thus median expenditure is Rs. 1500 per week.
113.Find the median of the following data :

| Height <br> (in cm) | Less <br> than <br> 120 | Less <br> than <br> 140 | Less <br> than <br> 160 | Less <br> than <br> 180 | Less <br> than <br> 200 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 12 | 26 | 34 | 40 | 50 |

Ans:
[Board Term-1 2015]
We prepare following cumulative frequency table to find median class.

| Height | Frequency | $c . f$. |
| :--- | :--- | :--- |
| $100-120$ | 12 | 12 |
| $120-140$ | 14 | 26 |
| $140-160$ | 8 | 34 |
| $160-180$ | 6 | 40 |
| $180-200$ | 10 | 50 |
| Total | $N=50$ |  |

We have

$$
N=50 ; \frac{N}{2}=25
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 26 and the corresponding class is $120-140$. Thus median class is $120-140$.

Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =120+\left(\frac{25-12}{14}\right) \times 20 \\
& =120+\frac{260}{14} \\
& =120+18.57 \\
& =138.57
\end{aligned}
$$

114. The mean of the following distribution is 314 . Determine the missing frequency $x$.

| Class | $0-10$ | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | $x$ | 10 | 12 | 7 | 8 |

Ans:
[Board Term-1 2016]
We prepare following table to find mean.

| C.I. | $x$ | $f$ | $u_{i}=\frac{x-f}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $1-10$ | 5 | 5 | -3 | -15 |
| $10-20$ | 15 | $x$ | -2 | $-2 x$ |
| $20-30$ | 25 | 10 | -1 | -10 |
| $30-40$ | 35 | 12 | 0 | 0 |
| $40-50$ | 45 | 7 | 1 | 7 |
| $50-60$ | 55 | 8 | 2 | 16 |
| Total |  | $42+x$ |  | $-2 x-2$ |

Let mid point of class $30-40$ be assumed mean $a$.

Mean

$$
\begin{aligned}
a & =35 \\
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
31.4 & =35+\frac{-2 x-2}{42+x} \times 10 \\
(2 x+2) 10 & =(42+x)(3.6) \\
20 x+20 & =151.2+3.6 x \\
16.4 x & =131.2 \Rightarrow x=8
\end{aligned}
$$

115. Calculate the mean of the following frequency distribution :

| Class | $10-30$ | $30-50$ | $50-70$ | $70-90$ | $90-$ <br> 110 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 15 | 18 | 25 | 10 | 2 |

## Ans :

We prepare following table to find mean.

| C.I. | $f_{i}$ | $x_{i}$ | $u_{i}=\frac{x_{i}-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $10-30$ | 15 | 20 | -2 | -30 |
| $30-50$ | 18 | 40 | -1 | -18 |
| $50-70$ | 25 | $60=a$ | 0 | 0 |
| $70-90$ | 10 | 80 | 1 | 10 |
| $90-110$ | 2 | 100 | 2 | 4 |
| Total | $\sum f=70$ |  |  | $\sum f_{i} u_{i}$ <br> $=-34$ |

Let mid point of class $50-60$ be assumed mean $a$.

$$
a=60
$$

Mean

$$
\begin{aligned}
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =60+\frac{-34}{70} \times 20 \\
& =60-9.71=50.29
\end{aligned}
$$

116.Heights of students of class $X$ are given in the following distribution :

| Heights (in <br> $\mathrm{cm})$ | $150-$ <br> 155 | $155-$ <br> 160 | $160-$ <br> 165 | $165-$ <br> 170 | $170-$ <br> 175 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> students | 15 | 8 | 20 | 12 | 5 |

Find the modal height.
Ans :
[Board Term-1 2015]
Class 160-165 has the maximum frequency 20 , therefore this is model class.

Now

$$
l=160, f_{1}=20, f_{o}=8, f_{2}=12, h=5
$$

Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =160+\left(\frac{20-8}{40-8-12}\right) \times 5 \\
& =160+\left(\frac{12}{20}\right) \times 5 \\
& =163
\end{aligned}
$$

Thus modal height is 163 cm .
117.A school conducted a test (of 100 marks) in English for students of Class $X$. The marks obtained by students are shown in the following table :

| Marks <br> obtained | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 | $70-$ <br> 80 | $80-$ <br> 90 | $90-$ <br> 100 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 1 | 2 | 4 | 15 | 15 | 25 | 15 | 10 | 2 | 1 |

Find the modal marks.
Ans :
[Board Term-1 2015]
Class 50-60 has the maximum frequency 25 , therefore this is model class.

Here

$$
l=50, f_{1}=25, f_{0}=15, f_{2}=15, h=10
$$

Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =50+\frac{25-15}{50-15-15} \times 10
\end{aligned}
$$

$$
\begin{aligned}
& =50+\frac{10}{20} \times 10 \\
& =50+10=55
\end{aligned}
$$

118. The following frequency distribution shows the number of runs scored by some batsman of India in one-day cricket matches :

| Run <br> scored | $2000-$ <br> 4000 | $4000-$ <br> 6000 | $6000-$ <br> 8000 | $8000-$ <br> 10000 | $10000-$ <br> 12000 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> batsmen | 9 | 8 | 10 | 2 | 1 |

Find the mode for the above data.
Ans :
[Board Term-1 2015]
Class 6000-8000 has the maximum frequency 10 , therefore this is model class.

Here $f_{0}=8, f_{1}=10, f_{2}=2, h=2000$, and $l=6000$

Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =6000+\left(\frac{10-8}{20-8-2}\right) \times 2000 \\
& =6000+\frac{2}{10} \times 2000 \\
& =6000+400 \\
& =6400
\end{aligned}
$$

119. A group of students conducted a survey of their locality to collect the data regarding number of plants and recorded it in the following table :

| Number <br> of plants | $0-3$ | $3-6$ | $6-9$ | $9-12$ | $12-15$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of houses | 2 | 4 | 5 | 1 | 2 |

Find the mode for the above data.
Ans :
[Board Term-1 2015]
Class 6-9 has the maximum frequency 5 , therefore this is model class.

Now $l_{1}=6, f_{1}=5, f_{0}=4, f_{2}=1, h=3$
Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}} h\right. \\
& =6+\frac{5-4}{10-4-1} \times 3 \\
& =6+\frac{1}{5} \times 3
\end{aligned}
$$

$$
=6+0.6=6.6
$$

120.If the median for the following frequency distribution is 28.5 , find the value of $x$ and $y$ :

| Class | Frequencies |
| :--- | :--- |
| $0-10$ | 5 |
| $10-20$ | $x$ |
| $20-30$ | 20 |
| $30-40$ | 15 |
| $40-50$ | $y$ |
| $50-60$ | 5 |
| Total | 60 |

Ans :
[Board Term-1 2013]
We prepare following cumulative frequency table to find median class.

| C.I. | $f$ | c.f. |
| :--- | :--- | :--- |
| $0-10$ | 5 | 5 |
| $10-20$ | $x$ | $x+5$ |
| $20-30$ | 20 | $x+25$ |
| $30-40$ | 15 | $x+40$ |
| $40-50$ | $y$ | $x+y+40$ |
| $50-60$ | 5 | $x+y+45$ |
|  | $\sum f=60$ |  |

Since, median is 28.5 which lies between 20-30. Thus model class is $20-30$.

From table

$$
\begin{align*}
N & =x+y+45 \\
60 & =x+y+45 \\
x+y & =60-45=15 \tag{1}
\end{align*}
$$

Median,

$$
M_{d}=l+\left(\frac{\frac{N}{2}-F}{f}\right) h
$$

$$
28.5=20+\frac{[30-(x+5)]}{20} \times 10
$$

$$
8.5=\frac{25-x}{2}
$$

$$
25-x=17 \Rightarrow x=25-17=8
$$

From (1),

$$
y=15-8=7
$$

Hence, $x=8$ and $y=7$
121.If the mean of the following data is 14.7 , find the
values of $p$ and $q$.

| Class | $0-6$ | $6-$ <br> 12 | $12-$ <br> 18 | $18-$ <br> 24 | $24-$ <br> 30 | $30-$ <br> 36 | $36-$ <br> 42 | Total |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | $p$ | 4 | 7 | $q$ | 4 | 1 | 40 |

Ans :
[Board Term-1 2013]

| Class | $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-6$ | 3 | 10 | 30 |
| $6-12$ | 9 | $p$ | $9 p$ |
| $12-18$ | 15 | 4 | 60 |
| $18-24$ | 21 | 7 | 147 |
| $24-30$ | 27 | $q$ | $27 q$ |
| $30-36$ | 33 | 4 | 132 |
| $36-42$ | 39 | 1 | 39 |
|  | Total | $\sum f_{i}=$ <br> $26+p+q=40$ | $\sum f_{i} x_{i}=$ <br> $408+9 p+27 q$ |

We have

$$
\begin{align*}
\sum f_{i} & =40 \\
26+p+q & =40 \\
p+q & =14 \tag{1}
\end{align*}
$$

Mean

$$
\begin{align*}
M & =\frac{\sum x_{i} f_{i}}{\sum f_{i}} \\
14.7 & =\frac{408+9 p+27 q}{40} \\
588 & =408+9 p+27 q \\
180 & =9 p+27 q \\
p+3 q & =20 \tag{2}
\end{align*}
$$

Subtracting equation (1) from (2) we have,

$$
2 q=6 \Rightarrow q=3
$$

Substituting this value of $q$ in equation (2) we get

$$
p=14-q=14-3=11
$$

Hence,

$$
p=11, q=3
$$

122.Find the mean and mode of the following frequency distribution :

| Classes | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 3 | 8 | 10 | 15 | 7 | 4 | 3 |

Ans :
[Board Term-1 2013]
We prepare following table to find mean.

| Classes | $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-10$ | 5 | 3 | 15 |
| $10-20$ | 15 | 8 | 120 |
| $20-30$ | 25 | 10 | 250 |
| $30-40$ | 35 | 15 | 525 |
| $40-50$ | 45 | 7 | 315 |
| $50-60$ | 55 | 4 | 220 |
| $60-70$ | 65 | 3 | 195 |
|  |  | $\sum f_{i}=50$ | $\sum f_{i} x_{i}=1640$ |

Mean

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{1640}{50}=32.8
$$

Class 30-40 has the maximum frequency 35 , therefore this is model class.

Here $l=30, f_{1}=15, f_{2}=7, f_{0}=10, h=10$

Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =30+\frac{15-10}{30-10-7} \times 10 \\
& =30+\frac{5}{13} \times 10 \\
& =30+\frac{50}{13} \\
& =30+3.85=3385
\end{aligned}
$$

123.Find the mean and median for the following data :

| Class | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 8 | 16 | 36 | 34 | 6 |

Ans :
[Board Term-1 2011]
We prepare following cumulative frequency table to find median class.

| Class | $x_{i}$ (class <br> marks) | $f_{i}$ | $f_{i} x_{i}$ | c.f. |
| :--- | :--- | :--- | :--- | :--- |
| $0-10$ | 5 | 8 | 40 | 8 |
| $10-20$ | 15 | 16 | 240 | 24 |
| $20-30$ | 25 | 36 | 900 | 60 |
| $30-40$ | 35 | 34 | 1190 | 94 |
| $40-50$ | 45 | 6 | 270 | 100 |
|  |  | $\sum f_{i}=100$ | $\sum f_{i} x_{i}=2640$ |  |

Mean

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{2640}{100}=26.4
$$

We have

$$
N=100 ; \frac{N}{2}=50
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 60 and the corresponding class is $20-30$. Thus median class is $20-30$.

$$
\text { Median, } \quad \begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =20+\frac{50-24}{36} \times 10 \\
& =20+7.22=27.22
\end{aligned}
$$

124.If the median of the following data is 240 , then find the value of $f$ :

| Classes | $0-$ <br> 100 | $100-$ <br> 200 | $200-$ <br> 300 | $300-$ <br> 400 | $400-$ <br> 500 | $500-$ <br> 600 | $600-$ <br> 700 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 15 | 17 | f | 12 | 9 | 5 | 2 |

Ans:
[Board Term-1 2011]
We prepare following cumulative frequency table to find median class.

| Classes | $f_{i}$ | c.f. |
| :--- | :--- | :--- |
| $0-100$ | 15 | 15 |
| $100-200$ | 17 | 32 |
| $200-300$ | $f$ | $32+f$ |
| $300-400$ | 12 | $44+f$ |
| $400-500$ | 9 | $53+f$ |
| $500-600$ | 5 | $58+f$ |
| $600-700$ | 2 | $60+f$ |

From table, $\quad N=60+f \Rightarrow \frac{N}{2}=\frac{60+f}{2}$
Since median is 240 which lies between class 200-300.
Thus median class is $200-300$.
Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
240 & =200+\left[\frac{\frac{60+f}{2}-32}{f}\right] \times 100 \\
40 & =\left[\frac{60+f-64}{2 f} \times 100\right.
\end{aligned}
$$

$$
\begin{aligned}
& 8 f=10 f-40 \\
& 2 f=40 \Rightarrow f=20
\end{aligned}
$$

125.The following table shows the weights (in gms) of a sample of 100 apples, taken from a large consignment :

| Weight <br> (in <br> gms) | $50-$ <br> 60 | $60-$ <br> 70 | $70-$ <br> 80 | $80-$ <br> 90 | $90-$ <br> 100 | $100-$ <br> 110 | $110-$ <br> 120 | $120-$ <br> 130 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of <br> Apples | 8 | 10 | 12 | 16 | 18 | 14 | 12 | 10 |

Find the median weight of apples.
Ans :
[Board Term-1 2011]

| C.I. | $50-$ <br> 60 | $60-$ <br> 70 | $70-$ <br> 80 | $80-$ <br> 90 | $90-$ <br> 100 | $100-$ <br> 110 | $110-$ <br> 120 | $120-$ <br> 130 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $f$ | 8 | 10 | 12 | 16 | 18 | 14 | 12 | 10 |
| c.f. | 8 | 18 | 30 | 46 | 64 | 78 | 90 | 100 |

We have

$$
N=100 ; \frac{N}{2}=50
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 64 and the corresponding class is $90-100$. Thus median class is $90-100$.

Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =90+\left(\frac{50-46}{18}\right. \\
& =90+\frac{40}{18}=92.2 \\
& =92.2 \mathrm{gm}
\end{aligned}
$$

Thus median weight is 92.2 .
126. Weekly income of 600 families is given below :

| Income <br> (in Rs.) | $0-$ <br> 1000 | $1000-$ <br> 2000 | $2000-$ <br> 3000 | $3000-$ <br> 4000 | $4000-$ <br> 5000 | $5000-$ <br> 6000 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of <br> Families | 250 | 190 | 100 | 40 | 15 | 5 |

Find the median.
Ans :
We prepare following cumulative frequency table to find median class.

| Income | No. of Families | c.f. |
| :--- | :--- | :--- |
| $0-1000$ | 250 | 250 |
| $1000-2000$ | 190 | 440 |
| $2000-3000$ | 100 | 540 |

| $3000-4000$ | 40 | 580 |
| :--- | :--- | :--- |
| $4000-5000$ | 15 | 595 |
| $5000-6000$ | 5 | 600 |
|  | $N=600$ |  |

We have

$$
N=600 ; \frac{N}{2}=300
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 440 and the corresponding class is 1000-2000. Thus median class is $1000-2000$.

$$
\text { Median, } \quad \begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
\text { Median } & =1000+\left(\frac{300-250}{190}\right) \times 1000 \\
& =1000+\frac{50}{190} \times 1000 \\
& =1000+\frac{5000}{19} \\
& =1000+263.16 \\
& =1263.16
\end{aligned}
$$

$$
\text { Median }=\text { Rs. } 1263.16
$$

127.Find the mean of the following distribution by step deviation method :

| Class | $0-10$ | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 13 | 20 | 15 | 7 | 5 |

Ans :
[Board Term-1 2011]

| Class | $x_{i}$ <br> (Class <br> Marks) | $u_{i}=$ <br> $\frac{x_{i}-a}{h}$ | $f_{i}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $0-10$ | 5 | -3 | 5 | -15 |
| $10-20$ | 15 | -2 | 13 | -26 |
| $20-30$ | 25 | -1 | 20 | -20 |
| $30-40$ | 35 | 0 | 15 | 0 |
| $40-50$ | 45 | 1 | 7 | 7 |
| $50-60$ | 55 | 2 | 5 | 10 |
|  | Total |  | $\sum f_{i}=65$ | $\sum f u_{i}=-44$ |

Let assumed mean, $a=35$ and given $h=10$.
Mean,

$$
\begin{aligned}
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =35+\frac{-44}{65} \times 10 \\
& =35-6.76=28.24
\end{aligned}
$$

128.The mean of the following distribution is 53 . Find the missing frequency $p$ :

| Class | $0-20$ | $20-40$ | $40-60$ | $60-80$ | $80-$ <br> 100 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 12 | 15 | 32 | $p$ | 13 |

Ans:
[Board Term-1 2011]

| Class | $x_{i}$ <br> (Class marks) | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-20$ | 10 | 12 | 120 |
| $20-40$ | 30 | 15 | 450 |
| $40-60$ | 50 | 32 | 1600 |
| $60-80$ | 70 | $p$ | $70 p$ |
| $80-100$ | 90 | 13 | 1170 |
|  | Total | $\sum f_{i}=$ <br> $72+p$ | $\sum f_{i} x_{i}=$ <br> $3340+70 p$ |

Mean,

$$
\begin{aligned}
\bar{x} & =\frac{\sum f_{i} x_{i}}{\sum f_{i}} \\
53 & =\frac{3340+70 p}{72+p} \\
3340+70 p & =53(72+p) \\
3340+70 p & =3816+53 p \\
70 p-53 p & =3816-3340 \\
17 p & =476 \\
p & =\frac{476}{17}=28
\end{aligned}
$$

129.Find the mean for the following data :

| Class | $24.5-$ | $29.5-$ | $34.5-$ | $39.5-$ | $44.5-$ | $49.5-$ | $54.5-$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | 29.5 | 34.5 | 39.5 | 44.5 | 49.5 | 54.5 | 59.5 |
| Frequency | 4 | 14 | 22 | 16 | 6 | 5 | 3 |

Ans:
[Board Term-1 2011]
We prepare following table to find mean.

| Class | Class <br> marks $\left(x_{i}\right)$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $24.5-29.5$ | 27 | 4 | 108 |
| $29.5-34.5$ | 32 | 14 | 448 |
| $34.5-39.5$ | 37 | 22 | 814 |
| $39.5-44.5$ | 42 | 16 | 672 |
| $44.5-49.5$ | 47 | 6 | 282 |
| $49.5-54.5$ | 52 | 5 | 260 |

| $54.5-59.5$ | 57 | 3 | 171 |
| :--- | :--- | :--- | :--- |
|  |  | $\sum f_{i}=70$ | $\sum f_{i} x_{i}=2,755$ |

Mean $\quad M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{2755}{70}=39.36$
130.Find the mode of following data :

| Marks | Below <br> 10 | Below <br> 20 | Below <br> 30 | Below <br> 40 | Below <br> 50 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 8 | 20 | 45 | 58 | 70 |

Ans:

| Class-Interval | Frequency |
| :--- | :--- |
| $0-10$ | 8 |
| $10-20$ | 12 |
| $20-30$ | 25 |
| $30-40$ | 13 |
| $40-50$ | 12 |
| Total | 70 |

Class 20-30 has the maximum frequency, therefore this is model class.

Now $\quad l=20, f_{1}=25, f_{2}=13, f_{0}=12, h=10$

$$
\text { Mode, } \quad \begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =20+\left(\frac{25-12}{50-12-13}\right) \times 10 \\
& =20+\frac{13}{25} \times 10 \\
& =20+5.2=25.2
\end{aligned}
$$

131.Find the mean of the following data:

| Class | Less <br> than <br> 20 | Less <br> than <br> 40 | Less <br> than <br> 60 | Less <br> than <br> 80 | Less <br> than <br> 100 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 15 | 37 | 74 | 99 | 120 |

## Ans :

[Board Term-1 2011]
We prepare following table to find mean.

| C.I. | $f_{i}$ | $x_{i}$ | $x_{i} f_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-20$ | 15 | 10 | 150 |

| $20-40$ | 22 | 30 | 660 |
| :--- | :--- | :--- | :--- |
| $40-60$ | 37 | 50 | 1850 |
| $60-80$ | 25 | 70 | 1750 |
| $80-100$ | 21 | 90 | 1890 |
|  | $\sum f_{i}=120$ |  | $\sum x_{i} f_{i}=6,300$ |

Mean $\quad M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{6300}{120}=52.5$
132.Find the mean of the following data :

| Classes | $0-20$ | $20-$ <br> 40 | $40-$ <br> 60 | $60-$ <br> 80 | $80-$ <br> 100 | $100-$ <br> 120 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 6 | 8 | 10 | 12 | 8 | 6 |

Ans :
[Board Term-1, 2011, Set-66]
We prepare following table to find mean.

| Classes | Frequency | Mid <br> points | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-20$ | 6 | 10 | 60 |
| $20-40$ | 8 | 30 | 240 |
| $40-60$ | 10 | 50 | 500 |
| $60-80$ | 12 | 70 | 840 |
| $80-100$ | 8 | 90 | 720 |
| $100-120$ | 6 | 110 | 660 |
|  | $\sum f_{i}=50$ |  | $\sum f_{i} x_{i}=3020$ |

Mean, $\quad M=\frac{\sum x_{i} f_{i}}{\sum f_{i}}=\frac{3020}{50}=60.4$
133. The sum of deviations of a set of values $x_{1}$, $x_{2}, x_{3}, \ldots \ldots \ldots \ldots, x_{n}$, measured from 50 is -10 and the sum of deviations of the values from 46 is 70 . Find the value of $n$ and the mean.
Ans:
We have,

$$
\begin{align*}
& \sum_{i=1}^{n}\left(x_{i}-50\right)=-10 \text { and } \sum_{i=1}^{n}\left(x_{i}-46\right)=70 \\
& \sum_{i=1}^{n} x_{i}-50 n=-10 \tag{1}
\end{align*}
$$

and

$$
\begin{equation*}
\sum_{i=1}^{n} x_{i}-46 n=70 \tag{2}
\end{equation*}
$$

Subtracting (2) from (1) we get,

$$
-4 n=-80 \Rightarrow n=20
$$

Substituting this value of $n$ in equation (1) we have

$$
\begin{array}{r}
\sum_{i=1}^{n} x_{i}-50 \times 20=-10 \\
\sum_{i=1}^{n} x_{i}=990
\end{array}
$$

Mean

$$
M=\frac{1}{n}\left(\sum_{i=1}^{n} x_{i}\right)=\frac{990}{20}=49.5
$$

Hence,

$$
n=20 \text { and mean }=49.5
$$

134. Prove that $\sum\left(x_{i}-\bar{x}\right)=0$

Ans :
We have

$$
\begin{aligned}
\bar{x} & =\frac{1}{n}\left(\sum_{i=1}^{n} x_{i}\right) \\
n \bar{x} & =\sum_{i=1}^{n} x_{i}
\end{aligned}
$$

Now, $\quad \sum_{i=1}^{n}\left(x_{i}-\bar{x}\right)=\left(x_{1}-\bar{x}\right)+\left(x_{2}-\bar{x}\right)+\ldots+\left(x_{n}-\bar{x}\right)$

$$
\begin{aligned}
& \sum_{i=1}^{n}\left(x_{i}-\bar{x}\right)=\left(x_{1}+x_{2}+\ldots+x_{n}\right)-n \bar{x} \\
& \sum_{i=1}^{n}\left(x_{i}-\bar{x}\right)=\sum_{i=1}^{n} x_{i}-n \bar{x}=\sum_{i=1}^{n}\left(x_{i}-\bar{x}\right)
\end{aligned}
$$

Hence, $\quad \sum_{i=1}^{n}\left(x_{i}-\bar{x}\right)=0$
135. Compute the median from the following data:

| Mid-values | 115 | 125 | 135 | 145 | 155 | 165 | 175 | 185 | 195 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 6 | 25 | 48 | 72 | 116 | 60 | 38 | 22 | 3 |

## Ans :

Here, the mid-values are given So, we should first find the upper and lower limits of the various classes. The difference between two consecutive values is $h=125-115=10$

Lower limit of a class $=\operatorname{Mid}$-value $-\frac{h}{2}$
Upper limit $=$ Mid- value $+\frac{h}{2}$

| Mid-value | Class <br> Groups | Frequency | Cumulative <br> Frequency |
| :--- | :--- | :--- | :--- |
| 115 | $110-120$ | 6 | 6 |
| 125 | $120-130$ | 25 | 31 |
| 135 | $130-140$ | 48 | 79 |
| 145 | $140-150$ | 72 | 151 |
| 155 | $150-160$ | 116 | 267 |

| 165 | $106-170$ | 60 | 327 |
| :--- | :--- | :--- | :--- |
| 175 | $170-180$ | 38 | 365 |
| 185 | $180-190$ | 22 | 387 |
| 195 | $190-200$ | 3 | 390 |

Now

$$
N=390 ; \frac{N}{2}=195
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 36 and the corresponding class is $150-160$. Thus median class is $150-160$.

Here, $\quad l=150, f=116, h=10, F=151$
Median, $\quad M_{d}=l+\left(\frac{\frac{N}{2}-F}{f}\right) h$
$=150+\frac{195-151}{116} \times 10$
$=153.8$
136. The mean of $n$ observations is $\bar{x}$, if the first term is increased by 1 , second by 2 and so on. What will be the new mean?
Ans :
I term +1
II term +2
III term +3
$n$ terms $+n$
The mean of the new numbers is
$\bar{x}+\frac{\frac{n(n+1)}{2}}{n}=\bar{x}=\frac{(n+1)}{2}$
137. The mode of a distribution is 55 and the modal class is $45-60$ and the frequency preceding the modal class is 5 and the frequency after the modal class is 10. Find the frequency of the modal class.
Ans :
Mode,

$$
M_{o}=55
$$

$$
\text { Modal class }=45-60
$$

Frequency of the class preceding,

$$
f_{1}=5
$$

Frequency of the class succeeding the modal class,

$$
f_{2}=10
$$

Let the frequency of modal class be $f$.
Mode

$$
\begin{aligned}
M_{o} & =l+\frac{f-f_{1}}{2 f-f_{1}-f_{2}} \times h \\
55 & =45+\frac{f-5}{2 f-5-10} \times 15 \\
10 & =\left(\frac{f-5}{2 f-15}\right) \times 15 \\
\frac{10}{15} & =\frac{f-5}{2 f-15} \\
\frac{2}{3} & =\frac{f-15}{2 f-15} \\
4 f-30 & =3 f-15 \\
4 f-3 f & =-15+30 \Rightarrow f=15
\end{aligned}
$$

| Class | Frequency |
| :--- | :--- |
| $600-700$ | $y$ |
| $700-800$ | 9 |
| $800-900$ | 7 |
| $900-1000$ | 4 |

Ans :
[Board 2020 Delhi OD STD]
We prepare cumulative frequency table as given below.

| Class Interval | Frequency $(f)$ | Cumulative <br> frequency c.f. |
| :--- | :--- | :--- |
| $0-100$ | 2 | 2 |
| $100-200$ | 5 | 7 |
| $200-300$ | $x$ | $7+x$ |
| $300-400$ | 12 | $19+x$ |
| $400-500$ | 17 | $36+x$ |
| $500-600$ | 20 | $56+x$ |
| $600-700$ | $y$ | $56+x+y$ |
| $700-800$ | 9 | $65+x+y$ |
| $800-900$ | 7 | $72+x+y$ |
| $900-1000$ | 4 | $76+x+y$ |
|  | $N=100$ |  |

From table we have

$$
\begin{align*}
76+x+y & =100 \\
x+y & =100-76=24 \tag{1}
\end{align*}
$$

Here median is 525 which lies between class $500-600$.
Thus median class is 500-600.
Median,

$$
M_{d}=l+\left(\frac{\frac{N}{2}-F}{f}\right) h
$$

$$
525=500+\left[\frac{\frac{100}{2}-(36+x)}{20}\right] \times 100
$$

$$
25=(50-36-x) 5
$$

$$
14-x=\frac{25}{5}=5
$$

$$
x=14-5=9
$$

Substituting the value of $x$ is equation (1), we get

$$
y=24-9=15
$$

Hence, $x=9$ and $y=15$
139.If the median of the following frequency distribution
is 32.5 . Find the values of $f_{1}$ and $f_{2}$.

| Class | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 | Total |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | $f_{1}$ | 5 | 9 | 12 | $f_{2}$ | 3 | 2 | 40 |

Ans:
[Board 2019 Delhi]

| Class | Frequency $(f)$ | Cumulative <br> Frequency $(c f)$ |
| :--- | :--- | :--- |
| $0-10$ | $f_{1}$ | $f_{1}$ |
| $10-20$ | 5 | $f_{1}+5$ |
| $20-30$ | 9 | $f_{1}+14$ |
| $30-40$ | 12 | $f_{1}+26$ |
| $40-50$ | $f_{2}$ | $f_{1}+f_{2}+26$ |
| $50-60$ | 3 | $f_{1}+f_{2}+29$ |
| $60-70$ | 2 | $f_{1}+f_{2}+31$ |
|  | $N=\sum f=40$ |  |

Now, $\quad f_{1}+f_{2}+31=40$

$$
\begin{align*}
f_{1}+f_{2} & =9 \\
f_{2} & =9-f_{1} \tag{1}
\end{align*}
$$

Since median is 32.5 , which lies in $30-40$, median class is $30-40$.

Here $l=30, \frac{N}{2}=\frac{40}{2}=20, f=12$ and $F=14+f_{1}$
Now,
median $=3.25$

$$
\begin{aligned}
l+\left(\frac{\frac{N}{2}-c f}{f}\right) \times h & =32.5 \\
30+\left(\frac{20-\left(14+f_{1}\right)}{12}\right) \times 10 & =32.5 \\
\left(\frac{6-f_{1}}{12}\right) \times 10 & =2.5 \\
\frac{60-10 f_{1}}{12} & =2.5 \\
60-10 f_{1} & =30 \\
10 f_{1} & =30 \Rightarrow f_{1}=3
\end{aligned}
$$

From equation (1), we get $f_{2}=9-3=6$
Hence, $f_{1}=3$ and $f_{2}=6$
140.The marks obtained by 100 students of a class is an examination are given below:

| Marks | $0-$ | $5-$ | $10-$ | $15-$ | $20-$ | $25-$ | $30-$ | $35-$ | $40-$ | $45-$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 |

| No. of <br> Students | 2 | 5 | 6 | 8 | 10 | 25 | 20 | 18 | 4 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Draw 'a less than' type cumulative frequency curves (ogive). Hence find median.
Ans :
[Board 2019 Delhi]

| Marks | No of students | $c f$ |
| :--- | :--- | :--- |
| Less than 5 | 2 | 2 |
| Less than 10 | 5 | 7 |
| Less than 15 | 6 | 13 |
| Less than 20 | 8 | 21 |
| Less than 25 | 10 | 31 |
| Less than 30 | 25 | 56 |
| Less than 35 | 20 | 76 |
| Less than 40 | 18 | 94 |
| Less than 45 | 4 | 98 |
| Less than 50 | 2 | 100 |

From graph, $\quad \frac{N}{2}=\frac{100}{2}=50$
Now, locate the point on the ogive where ordinate is 50. The $x$-coordinate corresponding to this ordinate is 28.8 . Therefore, the required median on the graph is 28.8 .
141.The arithmetic mean of the following frequency distribution is 53 . Find the value of $k$.

| Class | $0-20$ | $20-40$ | $40-60$ | $60-80$ | $80-100$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 12 | 15 | 32 | $k$ | 13 |

Ans :
[Board 2019 Delhi]

| Class <br> Interval | Class <br> Marks $\left(x_{i}\right)$ | Frequency <br> $\left(f_{i}\right)$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-20$ | 10 | 12 | 120 |
| $20-40$ | 30 | 15 | 450 |
| $40-60$ | 50 | 32 | 1600 |
| $60-80$ | 70 | $k$ | $70 k$ |
| $80-100$ | 90 | 13 | 1170 |
|  | Total | $72+k$ | $3340+70 k$ |

Mean,

$$
\begin{aligned}
M & =\frac{\sum f_{i} x_{i}}{\sum f_{i}} \\
53 & =\frac{3340+70 k}{72+k} \\
53(72+k) & =3340+70 k \\
3816+53 k & =3340+70 k \\
70 k-53 k & =3816-3340 \\
17 k & =476 \Rightarrow k=28
\end{aligned}
$$

Hence, value of $k$ is 28 .
142. The following distribution gives the daily income of 50 workers of a factory:

| Daily income <br> (in ₹) | $200-$ <br> 220 | $220-$ <br> 240 | $240-$ <br> 260 | $260-$ <br> 280 | $280-$ <br> 300 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> workers | 12 | 14 | 8 | 6 | 10 |

Convert the distribution above to a 'less than type' cumulative frequency distribution and draw its ogive.
Ans :
[Board 2019 Delhi]

| Daily Income (in ₹) | Cumulative <br> Frequency |
| :--- | :--- |
| Less than 220 | 12 |
| Less than 240 | 26 |
| Less than 260 | 34 |
| Less than 280 | 40 |
| Less than 300 | 50 |

143.Find the mode of the following frequency distribution

| Class <br> Interval | $25-$ <br> 30 | $30-$ <br> 35 | $35-$ <br> 40 | $40-$ <br> 45 | $45-$ <br> 50 | $50-$ <br> 55 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 25 | 34 | 50 | 42 | 38 | 14 |

Ans :
[Board 2019 OD Standard]

| $25-30$ | 25 |
| :--- | :--- |
| $30-35$ | 34 |
| $35-40$ | 50 |
| $40-45$ | 42 |
| $45-50$ | 38 |
| $50-55$ | 14 |

Class 35-40 has the maximum frequency 50 , therefore this is model class.

Now, $l=35 f_{1}=50, f_{0}=34, f_{2}=42, h=5$
Mode,

$$
\begin{gathered}
M_{o}=l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}} h\right. \\
=35+\left(\frac{50-34}{2 \times 50-34-42}\right) \times 5 \\
=35+\frac{16 \times 5}{24}=35+\frac{10}{3} \\
=\frac{105+10}{3}=\frac{115}{3}=38.33
\end{gathered}
$$

144. Change the following data into 'less than type' distribution and draw its ogive:

| Class <br> Interval | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 | $70-$ <br> 80 | $80-$ <br> 90 | $90-$ <br> 100 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 7 | 5 | 8 | 10 | 6 | 6 | 8 |

Ans :

| Classes | Cumulative frequency |
| :--- | :--- |
| less than 40 | 7 |
| less than 50 | $7+5=12$ |
| less than 60 | $12+8=20$ |
| less than 70 | $20+10=30$ |
| less than 80 | $30+6=36$ |
| less than 90 | $36+6=42$ |
| less than 100 | $42+8=50$ |

Scale : at $x$-axis, 1 small division $=10$ units at $y$-axis, 1 small division $=5$ units
145. The table below show the salaries of 280 persons:

| Salary (In thousand ₹) | No. of Persons |
| :--- | :--- |
| $5-10$ | 49 |
| $10-15$ | 133 |
| $15-20$ | 63 |
| $20-25$ | 15 |
| $25-30$ | 6 |
| $30-35$ | 7 |
| $35-40$ | 4 |
| $40-45$ | 2 |
| $45-50$ | 1 |

Calculate the median salary of the data.
Ans :
[Board 2018]

| Salary <br> (In thousand ₹) | No. of Persons $(f)$ | c.f. |
| :--- | :--- | :--- |
| $5-10$ | 49 | 49 |
| $10-15$ | 133 | 182 |
| $15-20$ | 63 | 245 |
| $20-25$ | 15 | 260 |
| $25-30$ | 6 | 266 |
| $30-35$ | 7 | 273 |
| $35-40$ | 4 | 277 |
| $40-45$ | 2 | 279 |
| $45-50$ | 1 | 280 |

We have

$$
\frac{N}{2}=\frac{280}{2}=140
$$

Commutative frequency greater than just greater than $\frac{N}{2}=140$ is 182 and the corresponding class is $10-15$. Thus median class is $10-15$.

$$
\text { Median } \quad \begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =10+\frac{(140-49}{133} \times 5 \\
& =10+\frac{91 \times 5}{133}=13.42
\end{aligned}
$$

Median salary is ₹ 13.42 thousand or ₹ 13420 (approx)
146.The mean of the following distribution is 18 . Find the frequency of the class 19-21.

| Class | $11-$ <br> 13 | $13-$ <br> 15 | $15-$ <br> 17 | $17-$ <br> 19 | $19-$ <br> 21 | $21-$ <br> 23 | $23-$ <br> 25 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 3 | 6 | 9 | 13 | $f$ | 5 | 4 |

Ans :
[Board 2018]

| Class | Class mark | Frequency $(f)$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $11-13$ | 12 | 3 | 36 |
| $13-15$ | 14 | 6 | 84 |
| $15-17$ | 16 | 9 | 144 |
| $17-19$ | 18 | 13 | 234 |
| $19-21$ | 20 | $f$ | $20 f$ |
| $21-23$ | 22 | 5 | 110 |
| $23-25$ | 24 | 4 | 96 |
|  |  | $40+f$ | $704+20 f$ |

Mean,

$$
M=\frac{\Sigma f_{x_{i}}}{\Sigma f_{i}}
$$

$$
\begin{aligned}
18 & =\frac{704+20 f}{40+f} \\
720+18 f & =704+20 f \Rightarrow f=8
\end{aligned}
$$

147. The following distribution gives the daily income of 50 workers of a factory:

| Daily Income <br> (in ₹) | $100-$ <br> 120 | $120-$ <br> 140 | $140-$ <br> 160 | $160-$ <br> 180 | $180-$ <br> 200 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> workers | 12 | 14 | 8 | 6 | 10 |

Convert the distribution above to a less than type cumulative frequency distribution and draw its ogive.

## Ans: [Board 2018]

Cumulative frequency distribution table is given below.

| Daily Income <br> (in ₹ $)$ | Number of <br> Workers (f) | Cumulative <br> Frequency (c.f.) |
| :--- | :--- | :--- |
| $100-120$ | 12 | 12 |
| $120-140$ | 14 | 26 |
| $140-160$ | 8 | 34 |
| $160-180$ | 6 | 40 |
| $180-200$ | 10 | 50 |

Cumulative frequency distribution table less than type is

| Less than Daily income <br> in $(₹)$ | Number of Workers $(f)$ |
| :--- | :--- |
| 100 | 0 |
| 120 | 12 |
| 140 | 26 |
| 160 | 34 |
| 180 | 40 |
| 200 | 50 |

148. Literacy rates of 40 cities are given in the following table. It is given that mean literacy rate is 63.5 , then find the missing frequencies $x$ and $y$.

| Literacy <br> rate (in <br> $\%)$ | $35-$ <br> 40 | $40-$ <br> 45 | $45-$ <br> 50 | $50-$ <br> 55 | $55-$ <br> 60 | $60-$ <br> 65 | $65-$ <br> 70 | $70-$ <br> 75 | $75-$ <br> 80 | $80-$ <br> 85 | $85-$ <br> 90 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of cities | 1 | 2 | 3 | $x$ | $y$ | 6 | 8 | 4 | 2 | 3 | 2 |

## Ans :

[Board Term-1 2016]
We prepare following table to find mean.

| C.I. | $x_{i}$ | $u_{i}$ | $f_{i}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- |
| $35-40$ | 37.5 | -5 | 1 | -5 |
| $40-45$ | 42.5 | -4 | 2 | -8 |
| $45-50$ | 75.5 | -3 | 3 | -9 |
| $50-55$ | 52.5 | -2 | $x$ | $-2 x$ |
| $55-60$ | 57.5 | -1 | $y$ | $-y$ |
| $60-65$ | $62.5=a$ | 0 | 6 | 0 |
| $65-70$ | 67.5 | 1 | 8 | 8 |
| $70-75$ | 72.5 | 2 | 4 | 8 |
| $75-80$ | 77.5 | 3 | 2 | 6 |
| $80-85$ | 82.5 | 4 | 3 | 12 |
| $85-90$ | 87.5 | 5 | 2 | 10 |
| Total |  |  | $\sum f_{i}=$ | $\sum f_{i} u_{i}=$ |

$$
\text { Here, } \begin{align*}
\sum f_{i} & =31+x+y=40 \\
x+y & =9 \\
\sum f_{i} u_{i} & =22-2 x-y  \tag{1}\\
\text { Mean } & \\
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
63.5 & =62.5+\frac{(22-2 x-y}{40} \times 5 \\
2 x+y & =14
\end{align*}
$$

Solving equation (1) and (2) we have $x=5$ and $y=4$
149.Find the mode of the following frequency distribution

| Class-Interval | $f$ |
| :--- | :--- |
| $25-35$ | 7 |
| $35-45$ | 31 |
| $45-55$ | 33 |
| $55-65$ | 17 |
| $65-75$ | 11 |
| $75-85$ | 1 |

Ans :
[Board Term-1 2015]
Class 44-45 has the maximum frequency 33, therefore this is model class.

Now $l_{1}=45, f_{0}=31, f_{1}=33 f_{2}=17, h=10$
Mode,

$$
\begin{aligned}
M_{o} & =l+h\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right. \\
& =45+\frac{33-31}{66-31-17} \times 10 \\
& =45+\frac{2}{18} \times 10=46.1
\end{aligned}
$$

150. On the sports day of a school, 300 students participated. Their ages are given in the following distribution :

| Age (in <br> years) | $5-7$ | $7-9$ | $9-11$ | $11-$ <br> 13 | $13-$ <br> 15 | $15-$ <br> 17 | $17-$ <br> 19 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 67 | 33 | 41 | 95 | 36 | 13 | 15 |

Find the mean and mode of the data.
Ans:
[Board Term-1 2015]
We prepare following table to find mean.

| Age | $x_{i}$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $5-7$ | 6 | 67 | 402 |

| $7-9$ | 8 | 33 | 264 |
| :--- | :--- | :--- | :--- |
| $9-11$ | 10 | 41 | 410 |
| $11-13$ | 12 | 95 | 1140 |
| $13-15$ | 14 | 36 | 504 |
| $15-17$ | 16 | 13 | 208 |
| $17-19$ | 18 | 15 | 270 |
|  |  | $\sum f_{i}=300$ | $\sum f_{i} x_{i}=3,198$ |

Mean,

$$
M=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{3,198}{300}=10.66
$$

Class 11-13 has the maximum frequency 95 , therefore this is model class.

Now

$$
l=11, f_{1}=95, f_{0}=41, f_{2}=36, h=2
$$

Mode,

$$
\begin{aligned}
M_{o} & =l+\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) h \\
& =11+\frac{95-41}{190-41-36} \times 2 \\
& =11+\frac{54}{113} \times 2 \\
& =11+0.95=1195
\end{aligned}
$$

151. The median of the following data is 525 . Find the values of $x$ and $y$ if the total frequency is 100 .

| Class Interval | Frequency |
| :--- | :--- |
| $0-100$ | 2 |
| $100-200$ | 5 |
| $200-300$ | $x$ |
| $300-400$ | 12 |
| $400-500$ | 17 |
| $500-600$ | 20 |
| $600-700$ | $y$ |
| $700-800$ | 9 |
| $800-900$ | 7 |
| $900-1000$ | 4 |
|  | $N=100$ |

Ans :
[Board Term-1 2013]
We prepare following cumulative frequency table to find median class.

| Class Interval | Frequency | Cumulative <br> frequency |
| :--- | :--- | :--- |
| $0-100$ | 2 | 2 |
| $100-200$ | 5 | 7 |

| $200-300$ | $x$ | $7+x$ |
| :--- | :--- | :--- |
| $300-400$ | 12 | $19+x$ |
| $400-500$ | 17 | $36+x$ |
| $500-600$ | 20 | $56+x$ |
| $600-700$ | $y$ | $56+x+y$ |
| $700-800$ | 9 | $65+x+y$ |
| $800-900$ | 7 | $72+x+y$ |
| $900-1000$ | 4 | $76+x+y$ |
|  | $N=100$ |  |

Here median is 525, which lies between class 500-600. Thus median class is $500-600$.

Now, $\quad 76+x+y=100$

$$
\begin{equation*}
x+y=100-76=24 \tag{1}
\end{equation*}
$$

Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
525 & =500+\left[\frac{\frac{100}{2}-(36+x)}{20}\right] \times 100 \\
25 & =(50-36-x 5 \\
(14-x) & =\frac{25}{5}=5 \\
x & =14-5=9
\end{aligned}
$$

Substituting the value of $x$ in equation (1),

$$
y=24-9=15
$$

Hence, $\quad x=9$ and $y=15$
152. Monthly expenditures on milk in 100 families of a housing society are given in the following frequency distribution :

| Monthly <br> expendi- <br> ture (in <br> Rs.) | $0-$ <br> 175 | $175-$ <br> 350 | $350-$ <br> 525 | $525-$ <br> 700 | $700-$ <br> 875 | $875-$ <br> 1050 | $1050-$ <br> 1125 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> families | 10 | 14 | 15 | 21 | 28 | 7 | 5 |

Find the mode and median for the distribution.
Ans :
[Board Term-1 2016]
We prepare following cumulative frequency table to find median class.

| C.I. | $f$ | c.f. |
| :--- | :--- | :--- |
| $0-175$ | 10 | 10 |

| $157-350$ | 14 | 24 |
| :--- | :--- | :--- |
| $350-525$ | 15 | 39 |
| $525-700$ | 21 | 60 |
| $700-875$ | 28 | 88 |
| $875-1050$ | 7 | 95 |
| $1050-1225$ | 5 | 100 |
|  | $N=100$ |  |

We have

$$
N=100 ; \frac{N}{2}=50
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 60 and the corresponding class is $525-700$. Thus median class is 525-700.

Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =525+\frac{50-39}{21} \times 175 \\
& =525+\frac{11}{21} \times 175 \\
& =525+91.6 \\
& =616.6
\end{aligned}
$$

Class 700-875 has the maximum frequency 28, therefore this is model class.

Here $l=700, f_{0}=21, f_{1}=28 f_{2}=7, h=175$
Mode,

$$
\begin{aligned}
M_{o} & =l+h\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) \\
& =700+\left(\frac{28-21}{2 \times 28-21-7}\right) \times 175 \\
& =700+\frac{7}{28} \times 175 \\
& =700+43.75 \\
& =743.75
\end{aligned}
$$

153. Calculate the average daily income (in Rs.) of the following data about men working in a company :

| Daily <br> income <br> (Rs.) | $<100$ | $<200$ | $<300$ | $<400$ | $<500$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of men | 12 | 28 | 34 | 41 | 50 |

Ans :
[Board Term-1 2012]
We prepare following table to find mean.

| Class | $x_{i}($ class <br> mark $)$ | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-100$ | 50 | 12 | 600 |
| $100-200$ | 150 | 16 | 2400 |
| $20-300$ | 250 | 6 | 1500 |
| $300-400$ | 350 | 7 | 2450 |
| $400-500$ | 450 | 9 | 4050 |
|  |  | $\sum f_{i}=50$ | $\sum f_{i} x_{i}$ <br> $=11,000$ |

Mean

$$
\begin{aligned}
M & =\frac{\sum x_{i} f_{i}}{\sum f_{i}}=\frac{11000}{50} \\
& =200
\end{aligned}
$$

Average daily income is Rs. 220.
154.If the mean of the following frequency distribution is 91 , and sum of frequency is 150 , find the missing frequency $x$ and $y$ :

| Class | $0-30$ | $30-$ <br> 60 | $60-$ <br> 90 | $90-$ <br> 120 | $120-$ <br> 150 | $150-$ <br> 180 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 12 | 21 | $x$ | 52 | $y$ | 11 |

Ans :
[Board Term-1 2012]
We prepare following table to find mean.

| Class | $x_{i}$ <br> (Class <br> marks) | $f_{i}$ | $f_{i} x_{i}$ |
| :--- | :--- | :--- | :--- |
| $0-30$ | 15 | 12 | 180 |
| $30-60$ | 45 | 21 | 945 |
| $60-90$ | 75 | $x$ | $75 x$ |
| $90-120$ | 105 | 52 | 5460 |
| $120-150$ | 135 | $y$ | $135 y$ |
| $150-180$ | 165 | 11 | 1815 |
|  | Total | $\sum f=$ <br> $x+y+96=150$ | $\sum_{8} f x_{i}=$ |

$$
\begin{aligned}
96+x+y & =150 \\
x+y & =54 \\
\bar{x} & =\frac{\sum f_{i} x_{i}}{\sum f_{i}} \\
91 & =\frac{8400+75 x+135}{150}
\end{aligned}
$$

$$
\begin{align*}
13650 & =8,400+75 x+135 y \\
75 x+135 y & =5250 \\
5 x+9 y & =350 \tag{2}
\end{align*}
$$

Solving equation (1) and (2) we get $x=34$ and $y=20$
155.Find the median of the following data :

| Profit (in lakh of rupee) | Number of shops |
| :--- | :--- |
| More than of equal to 5 | 30 |
| More than of equal to 10 | 28 |
| More than of equal to 15 | 16 |
| More than of equal to 20 | 14 |
| More than of equal to 25 | 10 |
| More than of equal to 30 | 7 |
| More than of equal to 35 | 3 |

## Ans :

[Board Term-1 2012]
We prepare following cumulative frequency table to find median class.

| Class | $f$ | c.f. |
| :--- | :--- | :--- |
| $5-10$ | 2 | 2 |
| $10-15$ | 12 | 14 |
| $15-20$ | 2 | 16 |
| $20-25$ | 4 | 20 |
| $25-30$ | 3 | 23 |
| $30-35$ | 4 | 27 |
| $35-40$ | 3 | 30 |
| Total | $\sum f=30=N$ |  |

We have

$$
N=30 ; \frac{N}{2}=15
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 16 and the corresponding class is $15-20$. Thus median class is $15-20$.

Median, $\quad M_{d}=l+\left(\frac{\frac{N}{2}-F}{f}\right) h$
Now, $\quad l=15, N=30, F=14, f=2 h=5$

$$
\text { Median, } \quad \begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =15+\left(\frac{15-14}{2}\right) \times 5 \\
& =15+2.5=17.5
\end{aligned}
$$

156.Find the value of $x$ and $y$, if the median for the
following data is 31 .

| Classes | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | Total |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | $x$ | 6 | $y$ | 6 | 5 | 40 |

## Ans :

[Board Term-1 2012]
We prepare following cumulative frequency table to find median class.

| C.I. | $f$ | c.f. |
| :--- | :--- | :--- |
| $0-10$ | 5 | 5 |
| $10-20$ | $x$ | $5+x$ |
| $20-30$ | 6 | $11+x$ |
| $30-40$ | $y$ | $11+x+y$ |
| $40-50$ | 6 | $17+x+y$ |
| $50-60$ | 5 | $22+x+y$ |
|  | Total 40 |  |

Since median is 31 , which lies between $30-40$. Thus median class is 30-40.

Here from table, $\quad N=22+x+y$

$$
\begin{align*}
40 & =22+x+y \\
x+y & =18 \tag{1}
\end{align*}
$$

Median,

$$
\begin{align*}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
31 & =30+\left[\frac{20-(11+x)}{y}\right] \times 10 \\
1 & =\frac{(9-x) \times 10}{y} \\
y & =90-10 x \\
10 x+y & =90 \tag{2}
\end{align*}
$$

Solving equation (1) and (2) we get $x=8$ and $y=10$
157.The following table gives the daily income of 50 workers of a factory.

| Daily <br> income <br> (in Rs.) | $100-$ <br> 120 | $120-$ <br> 140 | $140-$ <br> 160 | $160-$ <br> 180 | $180-$ <br> 200 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> Workers | 12 | 14 | 8 | 6 | 10 |

Find the mean, mode and median of the above data.
Ans:
[Board Term-1 2009]

| C.I. | $f_{i}$ | $c . f$. | $x_{i}$ | $u_{i}=$ <br> $\frac{x_{i}-a}{h}$ | $f_{i} u_{i}$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $100-$ <br> 120 | 12 | 12 | 110 | -2 | -24 |
| $120-$ <br> 140 | 14 | 26 | 130 | -1 | -14 |
| $140-$ <br> 160 | 8 | 34 | 150 | 0 | 0 |
| $160-$ <br> 180 | 6 | 40 | 170 | 1 | 6 |
| $180-$ <br> 200 | 10 | 50 | 190 | 2 | 20 |
|  | $\sum f$ <br> $=50$ |  |  |  | $\sum f_{i} u_{i}$ <br> $=-12$ |

Let $a$ be assumed mean be $a=150$
Mean

$$
\begin{aligned}
M & =a+\frac{\sum f_{i} u_{i}}{\sum f_{i}} \times h \\
& =150+\frac{-12}{50} \times 20 \\
& =150-4.8=145.2 \\
& N=50 ; \frac{N}{2}=25
\end{aligned}
$$

Now
Cumulative frequency just greater than $\frac{N}{2}$ is 26 and the corresponding class is $120-140$. Thus median class is $120-140$.

Now $l=120, f=14, F=12$ and $h=20$

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =120+\left(\frac{25-12}{14}\right) \times 20 \\
& =120+18.57 \times 138.57 \\
\text { Mode } & =3 \text { Median }-2 \text { Mean } \\
& =3 \times 138.57-2 \times 145.2 \\
& =415.71-290.4=125.31
\end{aligned}
$$

Hence, mean is 145.2 , median is 138.57 and mode is 125.31.

We prepare following table to find mean.
obtained by the students in an examination :

| Marks <br> obtained | $0-20$ | $20-40$ | $40-60$ | $60-80$ | $80-100$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 15 | 18 | 21 | 29 | 17 |

Given the mean of the above distribution is 53 , using empirical relationship estimate the value of its median.
Ans :
[Board Term-1 SQP 2017]
Class 60-80 has the maximum frequency 29, therefore this is model class.

Here, $l=60, f_{1}=29, f_{0}=21, f_{2}=17$ and $h=20$
Mode,

$$
\begin{aligned}
M_{o} & =l+h\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) \\
& =60+\frac{8}{58-38} \times 20 \\
& =60+8=68
\end{aligned}
$$

Now

$$
\begin{aligned}
3 M_{d} & =M_{o}+2 M \\
& =68+2 \times 53 \\
M_{d} & =\frac{174}{3}=58
\end{aligned}
$$

Hence median is 58 .
159.On the annual day of school, age-wise participation of students is given in the following frequency distribution table :

| Age (in years) | Number of students |
| :--- | :--- |
| Less than 6 | 2 |
| Less than 8 | 6 |
| Less than 10 | 12 |
| Less than 12 | 22 |
| Less than 14 | 42 |
| Less than 16 | 67 |
| Less than 18 | 76 |

Find the median of the students and how can get the median graphically?
Ans :
[Board Term-1 2016]

| Age of <br> students | C.I. | $c . f$. | $f$ |
| :--- | :--- | :--- | :--- |
| Less than 6 | $4-6$ | 2 | 2 |
| Less than 8 | $6-8$ | 6 | 4 |
| Less than 10 | $8-10$ | 12 | 6 |

| Less than 12 | $10-12$ | 22 | 10 |
| :--- | :--- | :--- | :--- |
| Less than 14 | $12-14$ | 42 | 20 |
| Less than 16 | $14-16$ | 67 | 25 |
| Less than18 | $16-18$ | 76 | 9 |

Now

$$
N=76 ; \frac{N}{2}=38
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 42 and the corresponding class is $12-14$. Thus median class is 12-14.

160.Find the median of the following data:

| Class <br> Interval | $0-$ <br> 20 | $20-$ <br> 40 | $40-$ <br> 60 | $60-$ <br> 80 | $80-$ <br> 100 | $100-$ <br> 120 | $120-$ <br> 140 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 6 | 8 | 10 | 12 | 6 | 5 | 3 |

How can we find the median graphically?
Ans:
[Board Term-1 2015]

| Classes | c.f. |
| :--- | :--- |
| More than 0 | 50 |
| More than 20 | 44 |
| More than 40 | 36 |
| More than 60 | 26 |
| More than 80 | 14 |
| More than 100 | 8 |
| More than 120 | 3 |

To draw an ogive we take the indices : $(0,50),(20,44)$, $(40,36),(60,26),(80,14),(100,8)$ and $(120,3)$.

From graph, $\quad \frac{N}{2}=\frac{50}{2}=25$
Median,

$$
M_{d}=61.6
$$

By Formula Method :

| Classes | $f$ | c.f. |  |
| :--- | :--- | :--- | :--- |
| $0-20$ | 6 | 6 |  |
| $20-40$ | 8 | 14 |  |
| $40-60$ | 10 | 24 |  |
| $60-80$ | 12 | 36 | Median Class |
| $80-100$ | 6 | 42 |  |
| $100-120$ | 5 | 47 |  |
| $120-140$ | 3 | 50 |  |

Now

$$
N=50 ; \frac{N}{2}=25
$$

Cumulative frequency just greater than $\frac{N}{2}$ is 36 and the corresponding class is $60-80$. Thus median class is $60-80$.

Now $l=60, f=12, F=24, h=20$
Median,

$$
\begin{aligned}
M_{d} & =l+\left(\frac{\frac{N}{2}-F}{f}\right) h \\
& =60+\frac{(25-24)}{12} \times 20 \\
& =60+\frac{1}{12} \times 20=60+\frac{5}{3} \\
& =\frac{185}{3} \\
& =61.67
\end{aligned}
$$

161.In annual day of a school, age-wise participation of students is shown in the following frequency
distribution :

| Age of <br> students (in <br> years) | $5-7$ | $7-9$ | $9-$ <br> 11 | $11-$ <br> 13 | $13-$ <br> 15 | $15-$ <br> 17 | $17-$ <br> 19 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> students | 20 | 18 | 22 | 25 | 20 | 15 | 10 |

Draw a 'less than type' ogive for the above data and from it find the median age.
Ans :
[Board Term-1 2015]

| Students | c.f. |
| :--- | :--- |
| Less than 7 | 20 |
| Less than 9 | 38 |
| Less than 11 | 60 |
| Less than 13 | 85 |
| Less than 15 | 105 |
| Less than 17 | 120 |
| Less than 19 | 130 |

This curve is the required cumulative frequency curve or an ogive of the less than type.

Here,

$$
N=130,
$$

So,

$$
\frac{N}{2}=\frac{130}{2}=65
$$

Now, we locate the point on the ogive whose ordinate is 65 . The $x$ co-ordinate corresponding to this
ordinate is 11.4. Hence. the required median on the graph is 11.4.
162.In an orchard, the number of apples on trees are below :

| Number <br> of <br> apples | more <br> than <br> of <br> equal <br> to <br> 50 | more <br> than <br> of <br> equal <br> to <br> 60 | more <br> than <br> of <br> equal <br> to <br> 70 | more <br> than <br> of <br> equal <br> to <br> 80 | more <br> than <br> of <br> equal <br> to <br> 90 | more <br> than <br> of <br> equal <br> to <br> 100 | more <br> than <br> of <br> equal <br> to <br> 110 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of trees | 60 | 55 | 39 | 29 | 10 | 6 | 2 |

Draw a 'more than type' ogive and hence obtain median from the curve.

Ans :
[Board Term-1 2015]

| Apples | c.f. |
| :--- | :--- |
| More than 50 | 60 |
| More than 60 | 55 |
| More than 70 | 39 |
| More than 80 | 29 |
| More than 90 | 10 |
| More than 100 | 6 |
| More than 110 | 2 |

This curve shows cumulative frequency on an ogive of the 'more than type'.

Here

$$
N=60
$$

So

$$
\frac{N}{2}=\frac{60}{2}=30
$$

Now, we locate the point on the ogive whose ordinate is 30 . The $x$-co-ordinate corresponding to this ordinate is 79 . Hence, the required median on the graph is 79 .
163.The following distribution gives the distribution of life times of washing machines of a certain company :

| Life time <br> (in hours) | $1000-$ <br> 1200 | $1200-$ <br> 1400 | $1400-$ <br> 1600 | $1600-$ <br> 1800 | $1800-$ <br> 2000 | $2000-$ <br> 2200 | $2200-$ <br> 2400 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of washing <br> machines | 15 | 60 | 68 | 86 | 75 | 61 | 45 |

Convert the above distribution into 'less than type' and draw its ogive.
Ans :
[Board Term-1 2015]

| Life time | c.f. |
| :--- | :--- |
| Less than 1200 | 15 |
| Less than 1400 | 75 |
| Less than 1600 | 143 |
| Less than 1800 | 229 |
| Less than 2000 | 304 |
| Less than 2200 | 365 |
| Less than 2400 | 410 |

164.Following distribution shows the marks obtained by a class of 100 students :

| Marks | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 15 | 30 | 32 | 8 | 5 |

Draw a 'more than' ogive for the above data
Ans :
[Board Term-1, 2012, Set-48]

| Marks | Frequency |
| :--- | :--- |
| More than 10 | 100 |
| More than 20 | 90 |
| More than 30 | 75 |
| More than 40 | 45 |
| More than 50 | 13 |
| More than 60 | 5 |
| More than 70 | 0 |

'More than' ogive is shown below :

165. Draw more than ogive for the following distribution. Find the median from the curve.

| Classes | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 18 | 40 | 20 | 12 |

## Ans:

[Board Term-1, 2012, Set-48]

| More than | c.f. |
| :--- | :--- |
| 0 | 100 |
| 10 | 90 |
| 20 | 72 |
| 30 | 32 |
| 40 | 12 |

From graph, $\quad \frac{N}{2}=\frac{100}{2}=50$
Hence, $\quad$ Median $=25$
166.The following distribution gives the daily income of 50 workers of a factory :

| Daily <br> income(In <br> Rs.) | $200-$ <br> 250 | $250-$ <br> 300 | $300-$ <br> 350 | $350-$ <br> 400 | $400-$ <br> 450 | $450-$ <br> 500 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of workers | 10 | 5 | 11 | 8 | 6 | 10 |

Convert the distribution to a 'less than type' cumulative frequency distribution and draw its ogive. Hence obtain the median of daily income.
Ans :
[Board Term-2, 2012, Set-55]

| Daily income (Classes) | No. of workers (c.f.) |
| :--- | :--- |
| Less than 250 | 10 |
| Less than 300 | 15 |
| Less than 350 | 26 |
| Less than 400 | 34 |
| Less than 450 | 40 |
| Less than 500 | 50 |

From graph. $\quad \frac{N}{2}=\frac{50}{2}=25$
Hence, Median daily income $=$ Rs. 345.
167.Draw "less than ogive" and more than ogive" for the following distribution and hence find its median :

| Class | $30-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 | $70-$ <br> 80 | $80-$ <br> 90 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 8 | 12 | 24 | 6 | 25 | 15 |

Ans:
[Board Term-1, 2012, Set-39, 48, 50]

| Less than | c.f. | More than | c.f. |
| :--- | :--- | :--- | :--- |
| 30 | 10 | 20 | 100 |
| 40 | 18 | 30 | 90 |
| 50 | 30 | 40 | 82 |
| 60 | 54 | 50 | 70 |
| 70 | 60 | 60 | 46 |
| 80 | 85 | 70 | 40 |
| 90 | 100 | 80 | 15 |

168. The following table gives the weight of 120 articles :

| Weight <br> (in kg) | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 14 | 17 | 22 | 26 | 23 | 18 |

Change the distribution to a 'more than type' distribution and draw its ogive.
Ans :
[Board Term-1, 2012, Set-48]

| Weight (in kg) 0 | Cumulative Frequency |
| :--- | :--- |
| More than to 10 | 120 |
| More than to 20 | 106 |
| More than to 30 | 89 |
| More than to 40 | 67 |
| More than to 40 | 41 |
| More than to 50 | 18 |
| More than to 60 | 0 |

Plotting the points :

169.Draw a 'more than ogive' for the following data:

| Class | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 | $70-$ <br> 80 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 9 | 10 | 12 | 8 | 7 | 5 | 4 |

Ans :
[Board Term-1, 2012, Set-48]

| More than | c.f. |
| :--- | :--- |
| 0 | 60 |
| 10 | 55 |
| 20 | 46 |
| 30 | 36 |
| 40 | 24 |
| 50 | 16 |
| 60 | 9 |
| 70 | 4 |
| 80 | 0 |

170. The distribution of monthly wages of 200 workers of a certain factory is as given below :

| Monthly <br> wages (in Rs.) | $80-$ <br> 100 | $100-$ <br> 120 | $120-$ <br> 140 | $140-$ <br> 160 | $160-$ <br> 180 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of <br> workers | 20 | 30 | 20 | 40 | 90 |

Change the above distribution to a 'more than type' distribution and draw its ogive.
Ans :
[Board Term-1, 2012, Set-60]

| Wages | c.f. |
| :--- | :--- |
| More than 80 | 200 |
| More than 100 | 180 |
| More than 120 | 150 |
| More than 140 | 130 |
| More than 160 | 90 |
| More than 180 | 0 |

171.The following are the ages of 200 patients getting medical treatment in a hospital on a particular day :

| Age (In <br> years) | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> Patients | 40 | 22 | 35 | 50 | 23 | 30 |

Write the above distribution as 'less than type' cumulative frequency distribution and also draw an ogive to find the median.
Ans :
[Board Term-1 2015]

| Less than | c.f. |
| :--- | :--- |
| 10 | 0 |
| 20 | 40 |
| 30 | 62 |
| 40 | 97 |
| 50 | 147 |
| 60 | 170 |
| 70 | 200 |

$\begin{array}{ll}\text { We have } & N=200 \\ \text { So, } & \frac{N}{2}=100\end{array}$

Plotting the obtained coordinates $(20,40),(30,62)$, $(40,97),(50,147),(60,170)$ and $(70,200)$ and draw 'less than type' curve.

172.The following frequency distribution shows the distance (in meters) thrown by 68 students in a Javelin throw competition.

| Distance <br> (in m) | $0-$ <br> 10 | $10-$ <br> 20 | $20-$ <br> 30 | $30-$ <br> 40 | $40-$ <br> 50 | $50-$ <br> 60 | $60-$ <br> 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number <br> of <br> students | 4 | 5 | 13 | 20 | 14 | 8 | 4 |

Draw a less than Ogive for the given data and find the median distance through using this curve.
Ans :

| Distance <br> (in m) | Number of <br> Students | Less than <br> distance (in <br> $\mathrm{m})$ | c.f. |
| :--- | :--- | :--- | :--- |
| $0-10$ | 4 | Less than 0 | 0 |
| $10-20$ | 5 | Less than 10 | 4 |
| $20-30$ | 13 | Less than 20 | 9 |
| $30-40$ | 20 | Less than 30 | 22 |
| $40-50$ | 14 | Less than 40 | 42 |
| $50-60$ | 8 | Less than 50 | 56 |
| $60-70$ | 4 | Less than 60 | 64 |
|  |  | Less than 70 | 68 |

The co-ordinates for drawing an ogive are $(0,0),(10$,
$4),(20,9),(30,22),(40,42),(50,56),(60,64)$, $(70,68)$.
